'Registrar Ready' is a simulation course designed to help you with your transition into a medical registrar role. The day will include common scenarios that a registrar may experience on the acute medical take. It will give you an opportunity to take on this role in a safe and confidential environment with the chance to reflect on the experience in a facilitated manner. The aim is to equip you with skills and help you to gain confidence as you progress towards a time when you will be doing this in real life!
