<b>Trainee Information System (TIS) Post Code</b> (and local post number if known)	23/KSS/RVV01/F1/014 & 23/KSS/RVVKC/F1/001 KSS/RVV01/004/F1/001 KSS/RVV01/004/F1/002
<b>Placement details</b> (i.e. the specialty and sub-specialty)	Respiratory Medicine
<b>Department</b>	Medicine

<p><b>Type of work to expect and learning opportunities</b></p>	<p>Cambridge K (the main respiratory) ward consists of 27 patients. But there are also 3 outlier wards (Oxford, King s D Female, and Rotary), on which there are outlying medical patients who come under the care of the respiratory team.</p> <p>There are two respiratory consultants looking after the patients at any time, and therefore two overall respiratory teams. Each team consists of a mixture of junior and senior doctors and are responsible for that cohort of patients</p> <p>Each consultant and therefore each team get about 10 patients on Cambridge K, and up to about 5 patients on outlying wards to look after. (The remaining 7 patients on Cambridge K are looked after by the endocrine team</p> <p>Every morning, there is a board round, in which all respiratory patients are discussed (mainly in terms of when their estimated discharge date is and what s keeping them in hospital to see if this can be expedited). After the board round, the juniors are assigned evenly to the 2 respiratory teams, usually in a way that continuity of patient care is maintained, and ward round occurs.</p> <p>Consultants are only available on Mondays, Wednesdays and Fridays. On Tuesdays and Thursdays, a consultant will come to see just the new patients, and the old patients are seen by the registrar and juniors on the team, continuing the plan made the previous day.</p> <p>Ward round usually finishes between 11:30 and 13:30, the consultant goes to their afternoon activity, and then we do the jobs. Jobs are pretty standard for any medical ward. Some jobs are done quickly on the spot as the ward round occurs, e.g. prescribing or crossing</p>
---	--

	<p>off drugs on the chart. The majority, however, is done at the ward round and consists of things like writing discharge summaries (EDNs) and drug TTOs for patients being discharged, ordering investigations, writing referrals on Careflow (the IT system for referrals), talking to other teams to make referrals or ask for advice, talking to patients or relatives regarding their progress, referring patients to the Med Reg at Canterbury hospital to be sent there (because they re medically fit but just in hospital for social/physio reasons). In the meanwhile, patients can of course also become sicker and there are queries from the nurses to answer and deal with as the day progresses.</p> <p>There are also practical procedures to do, ranging from taking important bloods, inserting cannulas that are difficult for the nurses, and from time to time pleural procedures such as chest drain insertions (always supervised by at least a registrar).</p> <p>The patients on the respiratory ward can be quite sick relative to other wards, and so it is easy to obtain practice at managing patients getting sick on the ward, but support is always available.</p>
<p><b>Where the placement is based</b></p>	<p>Cambridge J1 &amp; J2 (Respiratory) ward, but as with all medicine placements in the hospital, each F1 will have part of their rotation on an acute medicine block, which consists of clerking (patients who have been referred to by the A+E team as medical ) in A+E/AMU as part of the on call medical team.</p> <p>This is usually 1 month long, ending in a clinic/training week, in which the F1 can arrange to work/shadow in any other department of their choosing for career purposes or for different opportunities that are not usually available.</p>
<p><b>Clinical supervisor(s) for the placement</b></p>	<p>Dr Sharma Dr Baghai-Ravary Dr Syed Hassan</p>
<p><b>Main duties of the placement</b></p>	<p>Ward rounds and carrying out consultant s plans Writing discharge summaries Making referrals Ordering investigations Seeing patients, yourself when senior isn t readily available Bloods, cannulas, pleural procedures (if appropriate) During the acute block, seeing new medical patients in A+E, and formulating plans for them until post-taking them with the consultant.</p>

<p><b>Typical working pattern in this placement</b> (e.g. ward rounds, clinics, theatre sessions)</p>	<p>See above</p>
<p><b>Local education provider (LEP) / employer information</b></p>	<p>East Kent Hospitals University NHS Foundation Trust (EKHUFT) is one of the largest hospital trusts in the country, with more than 6,000 staff serving a population exceeding 700,000 and provides integrated patient care in East Kent with over 80 clinical specialties. <b>Placement details</b> (i.e. the specialty and sub-specialty)	General Surgery
<b>Department</b>	Surgery
<b>Type of work to expect and learning opportunities</b>	Busy district general hospital with both elective and emergency general surgical patients. Your main duty is ward based as well as helping with post-taking patients after an on-call. Occasionally, you are able to clerk in patients in A&E during oncalls and discuss cases with senior members of the team. You have the opportunity to attend clinics and theatre. Learning opportunities at daily morning handovers, ward rounds and MDT meetings.
<b>Where the placement is based</b>	Cheerful Sparrows Wards, QEQM
<b>Clinical supervisor(s) for the placement</b>	TBC
<b>Main duties of the placement</b>	The main duties of the placement are to provide pre-op and post-op care
<b>Typical working pattern in this placement</b> (e.g. ward rounds, clinics, theatre sessions)	A typical day would start with a ward round lead by a senior doctor. You make a list of jobs and complete these during the day. This would usually include ordering investigations, discussing radiological requests with Consultant Radiologists, taking blood, acting on investigation results and seeing sick patients /escalate them to senior review if appropriate. When your jobs are complete you can help the other surgical teams, attend theatre or attend clinic. For on-calls, you are based on the wards reviewing sick patients and completing outstanding day jobs from other surgical teams. There are two F1 structured teaching sessions a week in the Education Centre and surgical teaching sessions every Wednesday for the surgical team.

<b>Local education provider (LEP) / employer information</b>	The Trust is one of the largest in the country, employing over 6500 staff with many part-time employees. The Trust serves a population of over 720,000. The Trust has the vision to be known throughout the world as one of the top ten hospitals in England and the Kent hospital of choice for patients and those close to them. The EKHUFT's mission is to provide safe, patient focused and sustainable health services with and for the people of Kent. The Trust recognises that to achieve this it has a special responsibility for the most vulnerable members of the population that it serves. The Trust aims to work with local partners to develop excellent, modern clinical services, reducing both the length of time patients wait to be seen and to be treated and to make sure that it meets all the financial obligations. The East Kent Hospitals University NHS Foundation Trust serves a population of over 720,000 (approximately 20% over the age of 65). The population is spread across a geographical area

## Foundation Year 2 Programme

### Individual Placement Descriptor\*

	of over 700 square miles of a largely rural area with main urban population in Ashford, Folkestone, Canterbury, Dover, Margate, and Ramsgate. Local authority population figures are as follow: Ashford (111,200), Canterbury (146,200), Dover (106,400), Shepway (99,600), Swale (128,500) and Thanet (128,600).

<b>Placement details</b> (i.e. the specialty and sub-specialty)	Renal
<b>Department</b>	<p>The department consists of 10 renal consultants, 3-4 registrar's and 5 junior doctors.</p> <p>In addition to the doctors, the department has its own renal pharmacist, dietician, and a number of specialist nurses (e.g. peritoneal dialysis nurses, transplant nurses, vascular access nurses, haemodialysis nurses etc...) in addition to the standard ward staff.</p> <p>The department is a friendly and close-knit team. Many of the patients are known to the staff having been patients for many years and because they attend regularly for dialysis.</p>
<b>Type of work to expect and learning opportunities</b>	<p>A typical working day starts with a Ward round (9.00am). The junior doctor is expected to produce an updated list before the round and to have everything ready before the round.</p> <p>There are 2 Consultant ward rounds each week and 2 Registrar led ward rounds. On Wednesday there is a junior ward round for the chronic team and registrar led ward round for acute team.</p> <p>Ward rounds are often a great learning opportunity since juniors are expected to present patients and to know the recent test results as well as trends. Discussion and ideas are encouraged.</p> <p>There is often a huge diversity of clinical presentations on the ward. You can encounter anything from a marathon runner with acute renal failure secondary to rhabdomyolysis, or someone with myeloma, or a transplant patient with sepsis, or a dialysis patient with an acutely ischaemic limb. This variety presents fantastic learning opportunities.</p> <p>The ward also has procedure room where lines for dialysis are inserted. As a junior you will have the chance to place central lines (for temporary dialysis/plasma exchange) and to remove tunnelled lines.</p>

<p><b>Where the placement is based</b></p>	<p>The department effectively consists of 3 clinical areas; Marlowe ward (which has an 'acute' end and a 'chronic' end), the Thomas Beckett Dialysis Unit, and outpatients. As a junior doctor you will work primarily on the ward, patients will often be admitted from either outpatients or the dialysis unit. You may also be asked to review patients whilst they are on dialysis in the Thomas Beckett unit.</p>
<p><b>Clinical supervisor(s) for the placement</b></p>	<p>Varies between the Renal Consultants</p>
<p><b>Main duties of the placement</b></p>	<p>In addition to standard ward duties (organising the ward round, taking bloods, writing discharge summaries etc...) you will also be expected to clerk in patients who are admitted to the ward. This is a common place event, and often you will be the first doctor they see on admission as many of the patients come straight onto the ward (bypassing Emergency Care Centre) having either been referred in by a specialist nurse, from dialysis, clinic or by a consultant at another hospital. Therefore, there are a lot of opportunities to practice clerking and initiating management</p>
<p><b>Typical working pattern in this placement</b> (e.g. ward rounds, clinics, theatre sessions)</p>	<p>Mon: 9-5pmward round  Tues: 9-5pmward round.  Wed: 9-5pmward round. 1-2pm department teaching. (you will be required to do a presentation in this placement at this teaching or journal club).  Thurs: 9-5pmward round and Protected F2 teaching 2-4:15pm.  Friday: 9-5pmward round and medical directorate lunchtime teaching</p> <p>On call requirements:  1:8 - weekends and 1:8 weekdays covering Neurology, Renal and Haematology</p>

<b>Local education provider (LEP) / employer information</b>	<p>The Trust is one of the largest in the country, employing over 6500 staff with many part-time employees. The Trust serves a population of over 720,000. The Trust has the vision to be known throughout the world as one of the top ten hospitals in England and the Kent hospital of choice for patients and those close to them. The EKHUFT's mission is to provide safe, patient focused and sustainable health services with and for the people of Kent. The Trust recognises that to achieve this it has a special responsibility for the most vulnerable members of the population that it serves. The Trust aims to work with local partners to develop excellent, modern clinical services, reducing both the length of time patients wait to be seen and to be treated and to make sure that it meets all the financial obligations. The East Kent Hospitals University NHS Foundation Trust serves a population of over 720,000 (approximately 20% over the age of 65). The population is spread across a geographical area of over 700 square miles of a largely rural area with main urban population in Ashford, Folkestone, Canterbury, Dover, Margate, and Ramsgate. Local authority population figures are as follow: Ashford (111,200), Canterbury (146,200), Dover (106,400), Shepway (99,600), Swale (128,500) and Thanet (128,600).</p>

<b>Placement details</b> (i.e. the specialty and sub-specialty)	Urology
<b>Department</b>	There are 7 consultants, and a number of the sisters and nurses have been working in the department for many years. It is the only hospital in the south of England to have a Da Vinci Robot to perform radical prostatectomies. Along with the high number of consultants and top of the range robotic equipment East Kent Hospital University is a specialist urology centre. The ward is catered for the very high turnover of patients, and nurses are trained and experienced enough to recognise urological emergencies and take appropriate action i.e. bladder scan, bladder washout etc.
<b>Type of work to expect and learning opportunities</b>	Typical day starts at 7:45 ensuring list is updated, patients for theatre that morning have had G&S, blood clotting and any urgent cannulas. At 8am there is handover from the night teams for new admissions, which we then go and see. After that, we then start the ward round, usually split into cold (elective) ward round and hot (emergency) ward round with the registrar and/or on-call consultant often during the WR some of the other consultants will come to see their patients and one of the house officers will peel in from the main ward round to join them. Then after the ward round jobs (including catheterisation, cannulation, discharges, managing urosepsis, urinary retention, referrals, arranging appropriate antibiotic treatment, addressing concerns of families, arranging imaging etc) are completed in order of priority whilst addressing emergencies that may come up on the ward throughout the day. There will be exposure to Urological emergencies and management of Urological/surgical patients both pre and post operatively. Once every month, there is a morbidity and mortality meeting for the previous month a PowerPoint set up by the house officers of all the patients that have had post op complications or passed away in the previous month. Complications must be recorded from the ward round.
<b>Where the placement is based</b>	Kent and Canterbury Hospital - Clarke Ward + covering Kent ward during on-call shifts

<b>Clinical supervisor(s) for the placement</b>	TBC
---	-----

	
<b>Main duties of the placement</b>	EDNs, catheter insertion male and female, cannulas, bloods, referrals, arranging imaging and ensuring senior review, blood transfusions, assessing urosepsis and managing appropriately, urinary retention, renal colic and haematuria management when to intervene, prescription charts, fluid management, palliative care management.
<b>Typical working pattern in this placement</b> (e.g. ward rounds, clinics, theatre sessions)	<p>Mon:8-5pm Ward Round  Tues: 8-5pm Ward Round. Protected F1 teaching 1pm-2pm  Wed: 8-5pm Ward Round  Thursday: 8-5pm Ward Round Protected F1 teaching 1pm-2pm  Friday: Medical Directorate teaching 1pm-2pm. 8-5pm Ward Round</p> <p>Sat: 8am-8pm (handover starts at 8pm)  Sun: : 8am-8pm (handover starts at 8pm) one house officer covers all of surgery</p>

<b>Trust</b>	East Kent Hospital University NHS Foundation Trust
<b>Site</b>	Kent and Canterbury Hospital
<b>Trainee Information System (TIS) Post Code</b> (and local post number if known)	23/KSS/RVVKC/F1/014 & 23/KSS/RVVKC/F1/014: KSS/RVVKC/015/F1/001
<b>Placement details</b> (i.e. the specialty and sub-specialty)	Renal Medicine
<b>Department</b>	<p>The department consists of 10 renal consultants, 3-4 registrars and 5 junior doctors.</p> <p>In addition to the doctors, the department has its own renal pharmacist, dietician, and a number of specialist nurses (e.g. peritoneal dialysis nurses, transplant nurses, vascular access nurses, haemodialysis nurses etc ) in addition to the standard ward staff.</p> <p>The department is a friendly and close-knit team. Many of the patients are known to the staff having been patients for many years and because they attend regularly for dialysis.</p>

<p><b>Type of work to expect and learning opportunities</b></p>	<p>A typical working day starts with full team handover at 9am then a Ward round. The junior doctor is expected to produce an updated list before the round and to have everything ready before the round.</p> <p>There are 2 Consultant ward rounds each week and 2 Registrar led ward rounds. On Wednesday there is a Radiology meeting at 8.30am, followed by a junior ward round for the chronic team and registrar led ward wound for acute team.</p> <p>Ward rounds are often a great learning opportunity since juniors are expected to present patients and to know the recent test results as well as trends. Discussion and ideas are encouraged.</p> <p>There is often a huge diversity of clinical presentations on the ward. You can encounter anything from a marathon runner with acute renal failure secondary to rhabdomyolysis, or someone with myeloma, or a transplant patient with sepsis, or a dialysis patient with an acutely ischaemic limb. This variety presents fantastic learning opportunities.</p> <p>The ward also has procedure room where lines for dialysis are inserted. As a junior you will have the chance to place central lines (for temporary</p>
---	---

	dialysis/plasma exchange) and to remove the patient's
<b>Where the placement is based</b>	The department effectively consists of 3 clinical areas; Marlowe ward (which has an acute end and a chronic end), the Thomas Beckett Dialysis Unit, and outpatients. As a junior doctor you will work primarily on the ward, patients will often be admitted from either outpatients or the dialysis unit. You may also be asked to review patients whilst they are on dialysis in the Thomas Beckett unit.
<b>Clinical supervisor(s) for the placement</b>	Dr Kingston
<b>Main duties of the placement</b>	In addition to standard ward duties (organising the ward round, taking bloods, writing discharge summaries etc ) you will also be expected to clerk in patients who are admitted to the ward. This is a common place event, and often you will be the first doctor they see on admission as many of the patients come straight onto the ward (bypassing Emergency Care Centre) having either been referred in by a specialist nurse, from dialysis, clinic or by a consultant at another hospital. Therefore there are a lot of opportunities to practice clerking and initiating management.
<b>Typical working pattern in this placement</b> (e.g. ward rounds, clinics, theatre sessions)	<p>Mon: 9-5pm ward round</p> <p>Tues: 9-5pm ward round and Protected F1 teaching 1pm-2pm.</p> <p>Wed: 9-5pm ward round. 8.30 Vascular/Renal radiology meeting. 1-2pm department teaching. (you will be required to do a presentation in this placement at this teaching or journal club).</p> <p>Thurs: 9-5pm ward round and Protected F1 teaching 1pm-2pm</p> <p>Friday: 9-5pm ward round and medical directorate lunchtime teaching</p> <p><i>On call requirements:</i> Same as Medicine on-call 1:11.</p>
<b>Local education provider (LEP) / employer information</b>	East Kent Hospitals University NHS Foundation Trust (EKHUFT) is one of the largest hospital trusts in the country, with more than 6,000 staff serving a population exceeding 700,000 and provides integrated patient care in East Kent with over 80 clinical specialties. <b>Placement details</b> (i.e. the specialty and sub-specialty)	Renal
<b>Department</b>	<p>The department consists of 10 renal consultants, 3-4 registrars and 5 junior doctors.</p> <p>In addition to the doctors, the department has its own renal pharmacist, dietician, and a number of specialist nurses (e.g. peritoneal dialysis nurses, transplant nurses, vascular access nurses, haemodialysis nurses etc ) in addition to the standard ward staff.</p> <p>The department is a friendly and close-knit team. Many of the patients are known to the staff having been patients for many years and because they attend regularly for dialysis.</p>
<b>Type of work to expect and learning opportunities</b>	<p>A typical working day starts with a Ward round (9.00am). The junior doctor is expected to produce an updated list before the round and to have everything ready before the round.</p> <p>There are 2 Consultant ward rounds each week and 2 Registrar led ward rounds. On Wednesday there is a junior ward round for the chronic team and registrar led ward round for acute team.</p> <p>Ward rounds are often a great learning opportunity since juniors are expected to present patients and to know the recent test results as well as trends. Discussion and ideas are encouraged.</p> <p>There is often a huge diversity of clinical presentations on the ward. You can encounter anything from a marathon runner with acute renal failure secondary to rhabdomyolysis, or someone with myeloma, or a transplant patient with sepsis, or a dialysis patient with an acutely ischaemic limb. This variety presents fantastic learning opportunities.</p> <p>The ward also has procedure room where lines for dialysis are inserted. As a junior you will have the chance to place central lines (for temporary dialysis/plasma exchange) and to remove tunnelled lines.</p>

<b>Where the placement is based</b>	The department effectively consists of 3 clinical areas; Marlowe ward (which has an acute end and a chronic
	end), the Thomas Beckett Dialysis Unit, and Outpatients. As a junior doctor you will work primarily on the ward, patients will often be admitted from either outpatients or the dialysis unit. You may also be asked to review patients whilst they are on dialysis in the Thomas Beckett unit.
<b>Clinical supervisor(s) for the placement</b>	Varies between the Renal Consultants
<b>Main duties of the placement</b>	In addition to standard ward duties (organising the ward round, taking bloods, writing discharge summaries etc ) you will also be expected to clerk in patients who are admitted to the ward. This is a common place event, and often you will be the first doctor they see on admission as many of the patients come straight onto the ward (bypassing Emergency Care Centre) having either been referred in by a specialist nurse, from dialysis, clinic or by a consultant at another hospital. Therefore there are a lot of opportunities to practice clerking and initiating management.
<b>Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)</b>	<p>Mon: 9-5pm ward round      Tues: 9-5pm ward round.  Wed: 9-5pm ward round. 1-2pm department teaching. (you will be required to do a presentation in this placement at this teaching or journal club).      Thurs: 9-5pm ward round and Protected F2 teaching 24:15pm.  Friday: 9-5pm ward round and medical directorate lunchtime teaching</p> <p><i>On call requirements:</i>  1:8 - weekends and 1:8 weekdays covering Neurology, Renal and Haematology</p>
<b>Local education provider (LEP) / employer information</b>	<p>East Kent Hospitals University NHS Foundation Trust (EKHUFT) is one of the largest hospital trusts in the country, with more than 6,000 staff serving a population exceeding 700,000 and provides integrated patient care in East Kent with over 80 clinical specialties. <b>Placement details (i.e. the specialty and sub-specialty)</b>	Gastro-enterology
<b>Department</b>	Gastro-enterology
<b>Type of work to expect and learning opportunities</b>	Daily ward rounds with a different consultant each week. Expected to carry out jobs including organising and checking investigations and acting on the results and referrals to other specialities. Managing acutely unwell patients on the ward. The ward is made up of gastroenterology patients and acute patients from the young (<76yrs old) medical take patients. Opportunities to carry out procedures such as ascitic taps and drains. Opportunities to go with the Consultant/Registrar to assess patients referred to gastroenterology. Can try and attend at least one afternoon clinic if ward work is manageable. This rotation includes regular on calls. These are either in A&E post-taking new medical patients with consultants and clerking new medical patients. Alternatively, it will be ward cover on medical wards in the evening and over weekends. On Quex Ward at weekends there will always be a consultant to help.
<b>Where the placement is based</b>	Quex Ward
<b>Clinical supervisor(s) for the placement</b>	TBC
<b>Main duties of the placement</b>	Management of patients on Gastroenterology ward including jobs, procedures needed, liaising with different specialities, acute management when patients are unwell and discussions with patients and their family/next of kin.
<b>Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)</b>	Ward based 8am-5pm weekdays. There will be a combination of SHOs, registrars and consultant. Juniors tend to arrive first to prep notes and organise the handover ready for the day.
<b>Local education provider (LEP) / employer information</b>	East Kent Hospitals University NHS Foundation Trust (EKHUFT) is one of the largest hospital trusts in the country, with more than 6,000 staff serving a population exceeding 700,000 and provides integrated patient care in East Kent with over 80 clinical specialties. <b>Trainee Information System (TIS) Post Code</b>	KSS/RVV09/021/F1/001 KSS/RVV09/021/F1/002 KSS/RVV09/021/F1/004 KSS/RVV09/021/F1/005 KSS/RVV09/021/F1/006 KSS/RVV09/021/F1/007 KSS/RVV09/021/F1/009 New Post No. TBC ( <i>linked to Speciality programme</i> )
<b>Placement details</b> (i.e. the specialty and sub-specialty)	General Surgery
<b>Department</b>	Surgery
<b>Type of work to expect and learning opportunities</b>	Busy district general hospital with both elective and emergency general surgical patients. Ward based work with learning opportunities. You are able to discuss cases with senior members of the team. You have the opportunity to attend clinics and theatre. Learning opportunities at daily morning handovers, ward rounds and MDT meetings.
<b>Where the placement is based</b>	Cheerful Sparrows, QEQM
<b>Clinical supervisor(s) for the placement</b>	TBC
<b>Main duties of the placement</b>	The main duties of the placement are to provide pre-op and post-op care to patients.
<b>Typical working pattern in this placement</b> (e.g. ward rounds, clinics, theatre sessions)	A typical day would start with a ward round lead by a senior doctor. You make a list of jobs and complete these during the day. This could include ordering investigations, discussing radiological requests with Consultant Radiologists, taking blood, acting on blood results and investigations and seeing sick patients. When your jobs are complete you can help the other surgical teams, attend theatre or attend clinic. In your 4-month rotation you will do 2-3 weekends on call and will occasionally be on the rota to do an 8am 8.30pm week day on call which consists of regular duties + 3hour ward cover. For one on-call you get the opportunity to clerk in patients in A&E. For other oncalls you are based on the wards reviewing sick patients and completing outstanding day jobs from other surgical teams. There is surgical teaching sessions every Wednesday for the surgical team.

<b>Trust</b>	East Kent Hospitals University NHS Foundation Trust
<b>Site</b>	Queen Elizabeth The Queen Mother Hospital
<b>Trainee Information System (TIS) Post Code</b>	KSS/RVV09/030/F2/003
<b>Placement details (i.e. the specialty and sub-specialty)</b>	Emergency Medicine (N/A)
<b>Department</b>	A&E
<b>Type of work to expect and learning opportunities</b>	Opportunity to assess the undifferentiated patient by taking a focused history and performing an accurate clinical examination. You would be able to utilise the necessary investigations to make a list of differential diagnosis related to the patient's condition. It allows you to re-enforce all the skills learnt from medical school and F1/F2 jobs to re-enforce your knowledge and develop new skills. It allows for practice development in managing fractures and dislocation, surgery skills and allows you to see a broad spectrum of medical/surgical conditions in adults and children.
<b>Where the placement is based</b>	QEQM Margate
<b>Clinical supervisor(s) for the placement</b>	TBC
<b>Main duties of the placement</b>	You are mainly based in the Rapid Access Treatment and Walk-in Triage areas but there is ample opportunity to gain resus skills and to deal with minor injuries. Night shifts included. A demanding and busy rotation.
<b>Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)</b>	Varying rota. Day shifts are 8am-6pm, 10am-8pm, 2pm-10pm and 3:30pm-midnight. Night shift hours are 10pm-8:15am. Work 1 in 3 weekends.

<b>Placement details</b> (i.e. the specialty and sub-specialty)	Obstetrics and Gynaecology (N/A)
<b>Department</b>	Obstetrics and Gynaecology

**Foundation Year 2 Programme  
Individual Placement Descriptor\***

<b>Type of work to expect and learning opportunities</b>	Daily commitments include attending a variety of clinics (Antenatal, general gynae, urogynae, oncology, menstrual assessment clinic etc.) and theatre sessions. During clinics you are permitted to see your own patients, once confident, take histories and exam patients with the consultant and discuss management plans. Typically, we do not have our own patients but can examine with the SpR/Consultant. During theatre sessions you are required to assist, and can close incisions. With more experience and with supervision you are permitted to do day case procedures such as hysteroscopy. On calls include covering labour & gynae ward, day care and A&E and taking GP referrals. You do 1:9 obstetric on call and one gynae on call every week. In addition you are scheduled to do weekends and weekday nights and weekend nights.
<b>Where the placement is based</b>	QEQM Birchington ward (gynae inpatients), Kingsgate/Labour ward (obstetric inpatients) KCH outpatient clinics and day surgery
<b>Clinical supervisor(s) for the placement</b>	TBC
<b>Main duties of the placement</b>	Review your teams inpatients, attend clinics and theatres. On calls as above.
<b>Typical working pattern in this placement</b> (e.g. ward rounds, clinics, theatre sessions)	You are given a template of what shifts (long days, weekends etc) you will be working at the beginning of the placement, but the specific shifts/jobs that you will cover are released the week before. This can vary between working on labour ward, assessing patients in GAU or A&E, attending theatre to assist or helping in clinics for the day.

### Individual Placement Descriptor\*

<b>Trust</b>	East Kent Hospitals University NHS Foundation Trust
<b>Site</b>	Queen Elizabeth The Queen Mother Hospital
<b>Trainee Information System (TIS) Post Code</b>	KSS/RVV09/800/F2/003
<b>Programme Codes</b>	KSS/RVV09/F2/017 KSS/RVV09/F2/006 KSS/RVV09/F2/004
<b>Placement details (i.e. the specialty and sub-specialty)</b>	General Practice (N/A)
<b>Department</b>	Primary Care
<b>Type of work to expect and learning opportunities</b>	A fantastic opportunity to develop skills in initial assessment of patients presenting to health care services. Must develop good prioritisation skills, and recognise the importance of opportunistic health promotion in primary care.
<b>Where the placement is based</b>	Community General Practices in East Kent
<b>Clinical supervisor(s) for the placement</b>	General practitioner partner.
<b>Main duties of the placement</b>	Delivering primary care services to a wide range of service users, children through to geriatrics, and arranging appropriate further investigation, referral or follow up.
<b>Typical working pattern in this placement (e.g. ward rounds, clinics, theatre sessions)</b>	<p>Working hours generally 6 hours of clinic a day, usually between 9-6 but may finish later.</p> <p>Allowance for compulsory FY2 teaching Thursday afternoons. Specific GP FY2 teaching currently takes place on Wednesday afternoons.</p> <p>Up to three sessions available for audit, taster days or special interest days. If these are not arranged by the individual then extra clinics will be scheduled.</p> <p>Minimum six clinics initially 30 minute consultations, reducing to 20 minutes after 2-4 weeks. Although consulting on your own, each FY2 doctor is allocated a clinical supervisor who should have blocked sessions in their clinic to allow for supervision and ad hoc teaching.</p> <p>It is an opportunity to see a huge range of conditions both acute and chronic, serious and menial. Great prescribing practice and experience in managing chronic conditions. Also involves appropriate referral to secondary care, or other community services.</p>
