<b>Trust</b>	Royal Surrey County Hospital NHS Foundation Trust
<b>Site</b>	Royal Surrey County Hospital NHS Foundation Trust
<b>Trainee Information System (TIS) Post Code</b> (and local post number if known)	KSS/RA201/011/F1/004
<b>Placement details</b> (i.e. the specialty and sub-specialty)	Geriatric Medicine FY1 post
<b>Department</b>	<p>The Geriatric medicine department currently has 8.3 full time equivalent consultants. The department has an award winning Acute Frailty Service operating on the Emergency Floor 5 days per week. This service has expanded to include a Frailty specific Same Day Emergency Care facility and a Hospital at Home service.</p> <p>Other services include 3 frailty units in the Hospital mainframe and the stroke service which takes patients following acute treatment from Frimley Park Hospital.</p> <p>One consultant and two Associate Specialists run the orthogeriatric service looking after all patients admitted with hip fracture and the Milford Community Frailty Unit established during the pandemic. The department also oversees the Milford Integrated Care Hub (MICH) offering proactive Comprehensive Geriatric Assessment to community dwelling older people living with frailty and patients living with Parkinsons Disease.</p> <p>The department also contributes to the acute general medical on call, managing acute frailty services at weekends until 2pm.</p>
<b>Type of work to expect and learning opportunities</b>	The FY1 post is based on one of the thirty bedded acute geriatric medicine wards receiving complex frail elderly patients from the emergency assessment unit. This post is part of a team led by two consultants, a SpR, with 1 GPST , 3 FY2 and 2 FY1 doctors.

	<p>Geriatric medicine is an ideal early post enabling junior doctors to become confident in managing multiple co- morbidities, polypharmacy, chronic disease management, working closely with the whole multidisciplinary team and often relatives or carers in ensuring the best possible outcome for this often vulnerable group of patients</p> <p>The department has established a Frailty Academy, offering the opportunity to achieve Tier 1 and Tier 2 training of the Frailty Capabilities Framework. Weekly teaching is delivered where Foundation Doctors can develop skills and knowledge in identifying, understanding and managing frailty and to become a Frailty Champion. Foundation teaching is every Wednesday and Journal club for all physicians every Thursday. Trainees are strongly encouraged to attend these teaching sessions</p>
<b>Where the placement is based</b>	The post is based on Eashing Ward.
<b>Clinical supervisor(s) for the placement</b>	Clinical supervisors (at the current time) are Dr Myooran Ganeshanathan and Dr Chooi Lee.
<b>Main duties of the placement</b>	Duties include the day to day care of patients on the ward particularly in ensuring a complete history is available including collateral from relatives, carers and the GP. A problem list based approach is essential. Close liaison with the multidisciplinary team is required with daily Consultant led SAFER board rounds for discharge planning. Opportunities to attend clinic (e.g Movement disorder, TIA, CGA) as well as join the iOPALs team available.
<b>Typical working pattern in this placement</b> (e.g. ward rounds, clinics, theatre sessions)	<p>Daily board round and ward work. Frailty Academy Teaching Tuesday PM Journal club Thursday AM Weekly Foundation teaching sessions</p> <p>Time for QIP/audit activity and tasters to fit in with the team.</p> <p>Medical on call rota including - mixture of ward cover and clerking</p>
<b>Local education provider (LEP)/ employer information</b>	Royal Surrey NHS Foundation Trust is a friendly, supportive, busy but welcoming acute and community Trust that is ambitious about

	<p>developing our services and your career.</p> <p>Our compassionate, caring, friendly colleagues make up our Royal Surrey family and are at the heart of what we do. We all have a passion for learning, continuous improvement and excelling together through innovation, research and development. There are over 4,500 members of our Royal Surrey family.</p> <p>We are clinically led and provide joined up care by bridging the gap between hospital and community services alongside regional specialist cancer care. Our main acute hospital site is in Guildford with community hospital sites at Milford, Haslemere and Cranleigh. We provide adult community health services in the community and homes across Guildford and Waverley.</p> <p>We have received an overall Good rating from the CQC with Medical care (including older peoples care), End of Life care and Maternity services being deemed Outstanding by the CQC. We are investing in our colleagues through our health and wellbeing programme and a commitment to supporting professional development as well as investing more than £45 million in our physical environment and new equipment in the next few years.</p> <p>There has never been a better time to join us.</p>

The department also oversees the Milford Integrated Care Hub (MICH) offering proactive Comprehensive Geriatric Assessment to community dwelling older people living with frailty and patients living with Parkinsons Disease.</p> <p>The department also contributes to the acute general medical on call, managing acute frailty services at weekends until 2pm.</p>

<p><b>Type of work to expect and learning opportunities</b></p>	<p>The FY1 post is based within the acute frailty team, covering referrals from the Emergency Department, all patients living with frailty on the Emergency floor and the Frailty Same Day Emergency Care facility. The team is comprised of 5 consultants (not all full time), an associate specialist, five middle grades (1 acute medicine registrar, 1 geriatric medicine registrar, 3 specialty doctors), 5 FY1 doctors (on rotation), a physician associate, 3 trainee advanced clinical practitioners, occupational therapists and a social care practitioner.</p> <p>Geriatric medicine is an ideal early post enabling junior doctors to become confident in managing multiple co- morbidities, polypharmacy, chronic disease management, working closely with the whole multidisciplinary team and often relatives or carers in ensuring the best possible outcome for this often vulnerable group of patients. This post will give an excellent experience and understanding of services available both to hospital teams and to community teams for older people living with frailty. There is a new Frailty Same Day Emergency Care service (FSDEC) with the aim of avoiding inappropriate hospital admission.</p> <p>The department has established a Frailty Academy, offering the opportunity to achieve Tier 1 and Tier 2 training of the Frailty Capabilities Framework. Weekly teaching is delivered where Foundation Doctors can develop skills and knowledge in identifying, understanding and managing frailty and to become a Frailty Champion. Foundation teaching is every Wednesday and Journal club for all physicians every Thursday. Trainees are strongly encouraged to attend these teaching sessions.</p>
<p><b>Where the placement is based</b></p>	<p>The post is based on the emergency floor (emergency department and emergency assessment unit) and FSDEC</p>

<b>Clinical supervisor(s) for the placement</b>	Clinical supervisors (at the current time) are Dr James Adams, Dr Louise Green, Dr Agnes Toth, Dr Atif Khan, Dr Helen Wilson, Dr Maria Ionikov and Professor Jules Wright.
<b>Main duties of the placement</b>	<p>Duties includes assessment and management of acutely admitted older people with a clinical frailty score above 5 or a clinical frailty score of 4 presenting with a frailty syndrome. Liaising with MDT, GPs, families, care homes, and in-hospital teams as required. Follow-up of patients in FSDEC and MICH post-discharge.</p> <p>By nature, this post is closely supervised and provides an excellent learning environment.</p>
<b>Typical working pattern in this placement</b> (e.g. ward rounds, clinics, theatre sessions)	<p>Monday to Friday 08.30-17.00 with additional out of hours general medical on-calls.</p> <p>Frailty Academy Teaching Tuesday PM Journal club Thursday AM Weekly Foundation teaching sessions Time for QIP/audit activity and tasters to fit in with the team.</p>
<b>Local education provider (LEP)/ employer information</b>	<p>Royal Surrey NHS Foundation Trust is a friendly, supportive, busy but welcoming acute and community Trust that is ambitious about developing our services and your career.</p> <p>Our compassionate, caring, friendly colleagues make up our Royal Surrey family and are at the heart of what we do. We all have a passion for learning, continuous improvement and excelling together through innovation, research and development. There are over 4,500 members of our Royal Surrey family.</p> <p>We are clinically led and provide joined up care by bridging the gap between hospital and community services alongside regional specialist cancer care. Our main acute hospital site is in Guildford with community hospital sites at Milford, Haslemere and Cranleigh. We provide adult community health services in the community and homes across Guildford and Waverley.</p>

	<p>We have received an overall Good rating from the CQC with Medical care (including older peoples care), End of Life care and Maternity services being deemed Outstanding by the CQC. We are investing in our colleagues through our health and wellbeing programme and a commitment to supporting professional development as well as investing more than £45 million in our physical environment and new equipment in the next few years.</p> <p>There has never been a better time to join us.</p>

<b>Trust</b>	Royal Surrey NHS Foundation Trust
<b>Site</b>	Royal Surrey NHS Foundation Trust/University of Surrey
<b>Trainee Information System (TIS) Post Code</b> (and local post number if known)	KSS/RA201/666/F1/001
<b>Placement details</b> (i.e. the specialty and sub-specialty)	Academic F2 post (4 months research/4 months Paediatrics/4 months Diabetes and Endocrine)
<b>Department</b>	Academic department Royal Surrey NHS Foundation Trust, School of Health Sciences, University of Surrey
<b>Type of work to expect and learning opportunities</b>	Access to a number of large existing data sources to allow the academic FY2 doctor to undertake high- impact analyses of data generally collected as part of existing studies within the four-month placement.
<b>Where the placement is based</b>	School of Health Sciences at the University of Surrey + flexible home working
<b>Clinical supervisor(s) for the placement</b>	Prof Piers Gatenby (Consultant Surgeon) RSFT Dr Agnieszka Lemansak, Lecturer in Integrated Care, School of health Sciences, University of Surrey
<b>Main duties of the placement</b>	Design, develop and undertake an original research project based upon data accessible from large GP datasets. Complete training in analytical skills. Present research results at conference and prepare for publication.
<b>Typical working pattern in this placement</b> (e.g. ward rounds, clinics, theatre sessions)	4 days per week academic and 1 day clinical placement of choosing e.g. ED, radiology, anaesthetics Medical on call 1 weekend day every 4 weeks covering 1 medical ward (day time only).
<b>Local education provider (LEP)/ employer information</b>	The Royal Surrey NHS Foundation Trust is a leading general hospital and a specialist tertiary centre for Cancer, Oral Maxillo-Facial surgery and Pathology. The hospital serves a population of 320,000 for emergency and general hospital services and is the lead specialist centre for cancer patients in Surrey, West Sussex and Hampshire, serving a population of 1.2 million.
	projects and require all trainees to develop their projects in association with the FTPD so as their 4 months in academia is not wasted. In order to succeed all trainees will be contacted midway in their F1 year and offered supervision in developing the project. In order to maximise the training

opportunities each trainee will be required to submit a project plan prior to commencing their attachment.

Each research project has different phases,

- Idea-generating phase
- Problem-definition phase
- Procedures-design phase
- Observation phase
- Data-analysis phase
- Interpretation phase
- Communication phase

The ideal objective for the trainee to succeed and have a true experience of research is for the trainee to experience all phases of research. All these phases are unlikely to be completed in a single project in a four- month period. It is therefore important for each trainee to identify learning opportunities for each of these phases below within their foundation training. Thus the advantage of the unlinked academic foundation post is vast and also allows each trainee to tailor their academic period. Therefore, it is beholden on each trainee to complete their academic training with supervision.

Each trainee will have an **educational supervisor** for the whole year (Mr Yuen Soon, Prof David Russell Jones, Dr Charles Godden) and a **research supervisor** who will be identified in their F1 year who will be responsible for

direct research supervision. Each F2 will also have a **clinical supervisor** who is responsible for their clinical supervision during their academic four months.

Each trainee will be allowed to select a speciality to be attached to during their academic four months. During the four months each trainee will be supernumerary to the service requirements of the firm but will be required to contribute to two clinical sessions of the firm. These firms are to address clinical skills to develop same educational competencies as F2 in non- academic posts. These firms will be at the Royal Surrey. There will be no exceptions.

All research projects will be developed in

conjunction with research supervisors.

Research plans, methodology and protocols should be in place prior to commencing the academic four months. All efforts to facilitate this will be given by the educational centre. Research outside the trust will only be agreed if discussed with educational supervisors and FTPD. All steps must be taken to ensure sufficient mentoring by research supervisors if research is to be undertaken outside the trust.

During the year all trainees will be expected to attend a research methodology and statistic course. This will be budgeted out of the education centre.

It is hoped that each trainee will contribute sufficiently to each project so as to be included in each paper but also to have themselves written and submitted at least a poster to a national meeting.

At the end of the attachment each trainee will be expected to write a reflective practice of their four months of academia addressing all the phases of research as detailed above.

All academic F2 will be expected to complete the same competencies as non academic F2 to achieve F2 competencies to be signed of. There will be no exceptions.

In Summary each Trainee will need to:-

- 6 Mini CEX
- 6 CDB
- 3 DOPS
- Attend F2 teaching at RSCH (70%)
- Reflective practice on all research phases
- Present at a National Meeting or “Communicate” their research project to foundation Faculty group meeting.
- reflective practice on the 2 ethical Committee Meetings attended

Attend a statistical and research methodology

	course.
<b>Typical working pattern in this placement</b> (e.g. ward rounds, clinics, theatre sessions)	<p>Four months' academia, freeform fortnightly academic supervision. Two supernumerary clinical attachments per week. Attendance at compulsory Foundation Teaching. As per Paeds/Medical On Call</p>
<b>Local education provider (LEP)/ employer information</b>	<p>leading general hospital and a specialist tertiary centre for Cancer, Oral Maxillo-facial surgery and Pathology. <b>Trust</b>	Royal Surrey NHS Foundation Trust
<b>Site</b>	Milford Hospital
<b>Trainee Information System (TIS) Post Code</b> (and local post number if known)	NEEDS FIVE
<b>Placement details</b> (i.e. the specialty and sub-specialty)	Community Geriatric Medicine FY2 post
<b>Department</b>	<p>The Geriatric medicine department currently has 8.3 full time equivalent consultants. The department has an award winning Acute Frailty Service operating on the Emergency Floor 5 days per week. This service has expanded to include a Frailty specific Same Day Emergency Care facility and a Hospital at Home service.</p> <p>Other services include 3 frailty units in the Hospital mainframe, the stroke service which takes patients following acute treatment from Frimley Park Hospital.</p> <p>One consultant and two Associate Specialists run the orthogeriatric service looking after all patients admitted with hip fracture and the Milford Community Frailty Unit established during the pandemic. The department also oversees the Milford Integrated Care Hub (MICH) offering proactive Comprehensive Geriatric Assessment to community dwelling older people living with frailty and patients living with Parkinsons Disease.</p> <p>The department also contributes to the acute general medical on call, managing acute frailty services at weekends until 2pm.</p>

<p><b>Type of work to expect and learning opportunities</b></p>	<p>The FY2 post is based on one of two bedded acute community geriatric medicine wards receiving complex frail elderly patients from Royal Surrey County Hospital</p> <p>Geriatric medicine is an ideal early post enabling junior doctors to become confident in managing multiple co-morbidities, polypharmacy, chronic disease management, working closely with the whole multidisciplinary team and often relatives or carers in ensuring the best possible outcome for this often vulnerable group of patients</p> <p>The department has established a Frailty Academy, offering the opportunity to achieve Tier 1 and Tier 2 training of the Frailty Capabilities Framework. Weekly teaching is delivered where Foundation Doctors can develop skills and knowledge in identifying, understanding and managing frailty and to become a Frailty Champion. Foundation teaching is every Wednesday and Journal club for all physicians every Thursday. Trainees are strongly encouraged to attend these teaching sessions</p>
<p><b>Where the placement is based</b></p>	<p>The post is based on Holly and Oak ward</p>
<p><b>Clinical supervisor(s) for the placement</b></p>	<p>Clinical Supervisors (at the current time) are Dr Helen Wilson and Dr Collette Frittelli</p>
<p><b>Main duties of the placement</b></p>	<p>Daily review of patients          Liaising with families          Multi-professional working</p> <p>Milford hospital on call weekend ward cover (approximately 1 in 5) only. No night shift duties in this post.</p>
<p><b>Typical working pattern in this placement</b> (<i>e.g. ward rounds, clinics, theatre sessions</i>)</p>	<p>Daily board round and ward work.          Frailty Academy Teaching Tuesday PM</p> <p>Time for QIP/audit activity and tasters to fit in with the team.</p>

	Medical on call rota including mixture of ward cover and clerking
<b>Local education provider (LEP) / employer information</b>	<p>Royal Surrey NHS Foundation Trust is a friendly, supportive, busy but welcoming acute and community Trust that is ambitious about developing our services and your career.</p> <p>Our compassionate, caring, friendly colleagues make up our Royal Surrey family and are at the heart of what we do. We all have a passion for learning, continuous improvement and excelling together through innovation, research and development. There are over 4,500 members of our Royal Surrey family.</p> <p>We are clinically led and provide joined up care by bridging the gap between hospital and community services alongside regional specialist cancer care. Our main acute hospital site is in Guildford with community hospital sites at Milford, Haslemere and Cranleigh. We provide adult community health services in the community and homes across Guildford and Waverley.</p> <p>We have received an overall Good rating from the CQC with Medical care (including older peoples care), End of Life care and Maternity services being deemed Outstanding by the CQC. We are investing in our colleagues through our health and wellbeing programme and a commitment to supporting professional development as well as investing more than £45 million in our physical environment and new equipment in the next few years.</p> <p>There has never been a better time to join us.</p>

Individual Placement Descriptor\***

<b>Trust</b>	Royal Surrey County Hospital NHS Foundation Trust
<b>Site</b>	Royal Surrey County Hospital NHS Guildford
<b>Trainee Information System (TIS) Post Code</b> (and local post number if known)	KSS/RA201/800/F2/001 KSS/RA201/800/F2/002 KSS/RA201/800/F2/003 KSS/RA201/800/F2/004
<b>Placement details</b> (i.e. the specialty and sub-specialty)	General Practice FY2 Post
<b>Department</b>	FY2 posts in General Practice are based in a variety of practices in the Guildford area. Each post is based full time in a single practice, with an appropriately trained GP in the practice acting as Clinical Supervisor (CS). The CSs are supported by 3 Clinical Educational Supervisors (CES) who also meet weekly with all the FY2s in General Practice for a tutorial. The CESs co-ordinate a meeting for all CSs once in every 4-month block, for support and transfer of information regarding training. The trainees and trainers are given administrative support by Tracey Cookman at the Education centre of the Royal Surrey County Hospital, and support from the GP Deanery via Martin Brunet, one of the Guildford GP Programme Directors.
<b>Type of work to expect and learning opportunities</b>	Trainees will initially sit in with a variety of members of the primary health care team, including GPs, Practice Nurses, District Nurses, Health Visitors etc in order to gain experience and a better understanding of how primary care functions. They will then start their own surgeries, with appropriate supervision for their level of training, ensuring exposure to both acute presentations of illness and chronic disease management. There will be exposure to the challenge of visiting patients at home and consulting on the telephone, with frequent opportunities to debrief with their supervisor. They will be encouraged to develop and reflect on their consultations skills, and be expected to write their own referral letters and deal with the results of tests they have requested, thus developing the wider skills required in Primary Care.

	They will be expected to attend the weekly CES tutorials, as well as Foundation teaching in the hospital and practice-based meetings and <u>educational events, thus giving regular opportunity for more formal learning.</u>
<b>Where the placement is based</b>	In a variety of approved practices in and around Guildford.
<b>Clinical supervisor(s) for the placement</b>	Is provided by a named Clinical Supervisor who is one of the GPs in the practice.
<b>Main duties of the placement</b>	The duties of the post are tailored to suit the individual needs of the trainee and permit adequate patient contact in order to allow fruitful learning, rather than having a vital service requirement that must be filled. Patient contact is as detailed above.
<b>Typical working pattern in this placement</b> ( <i>e.g. ward rounds, clinics, theatre sessions</i> )	This will be dependent on each practice and the needs of the trainee. While the expectation would be for trainees to work for 10 sessions per week, of which 2-3 are related to study (CES tutorials, Foundation teaching and personal study time), many FY2s in GP will mirror the long days worked by their supervisor, and so work for 6-7 longer clinical sessions with a half day to compensate for the longer days (8.30-6.30). Each session will usually consist of a surgery followed by telephone calls and paperwork. Home visits would take place approximately 3 times per week. No Oncall requirements.
<b>Local education provider (LEP)/ employer information</b>	<p>The Royal Surrey County Hospital is a leading general hospital and a specialist tertiary centre for Cancer, Oral Maxillo-facial surgery and Pathology. The hospital serves a population of 320,000 for emergency and general hospital services and is the lead specialist centre for cancer patients in Surrey, West Sussex and Hampshire, serving a population of 1.2 million.</p> <p>Our annual income is £199m and employs almost 2,800 staff, making us the second largest employer in Guildford. <b>Trainee Information System (TIS) Post Code</b> (and local post number if known)	KSS/RA201/002/F2/001 – KSS/RA201/F2/18A
<b>Placement details</b> (i.e. the specialty and sub-specialty)	Paediatric FY2 post
<b>Department</b>	<p>The department currently has 6 full-time acute general consultants each with their own main subspecialty interest. (Endocrinology, Gastroenterology, Respiratory, Neurology, Nephrology &amp; Diabetes). All provide neonatal care.</p> <p>There are also 3 community consultants that are largely area based.</p> <p>Hascombe children ward include 16 acute beds, an ambulatory assessment bay &amp; the regional teenage oncology transition beds.</p> <p>Neonates (down to 28 weeks' gestation) are cared for on the special care baby unit (SCBU), on transitional care and on the post-natal wards.</p>
<b>Type of work to expect and learning opportunities</b>	<p>The FY2 post rotates as part of the junior tier of nine doctors between Hascombe and SCBU. There are seven GPVTS trainees and one ST2 Paediatric trainee. There are seven full time equivalent middle grade posts in support including 4 Paediatric ST4 (or higher). One Associate specialist and two WTE staff grades.</p> <p>The job is an ideal opportunity to expose Foundation trainee doctors to general paediatrics and level one neonatology. There is direct learning from daily Consultant led ward rounds. They work closely with the whole multidisciplinary team including relatives or carers in ensuring the best possible outcome for this vulnerable group of patients. They are expected to attend and observe 7 clinics in their four-month attachment.</p>
<b>Where the placement is based</b>	Hascombe Children's Ward SCBU, transitional care bay, post-natal wards, labour ward and occasional attendance to ED.
<b>Clinical supervisor(s) for the placement</b>	Dr Diarra Greene

<b>Main duties of the placement</b>	Duties include the day to day care of patients, particularly in ensuring a complete history is available from relatives & carers, examining patients, formulating differential diagnoses and being trained to perform simple practical procedures such as taking blood. A family based approach is essential. Close liaison with the whole team is essential.
<b>Typical working pattern in this placement</b> (e.g. ward rounds, clinics, theatre sessions)	Typical working pattern on Hascombe children's ward: 9am each day handover and Consultant teaching meeting 1 hour 10-12pm (ish) Consultant ward round. Afterwards ward work, admissions etc. Tues: WR Lunchtime X-ray or perinatal meeting
	Wed: FY2 Foundation Teaching Thurs: Neonates: attend deliveries, be trained and provide intermediate neonatal resuscitation as required, be trained to and then complete baby checks, attend the daily neonatal ward round, arrange required further assessments as per postnatal guidelines. Clinic attendance occurs in the 'cover' week. There is also a results week and ambulatory care week Annual leave is included in the rota. <i>Full shift:</i> (1 in 9 equivalent) EWTD compliant. This rota provides 24/7 cover 365 days per year. Rotas will be issued monthly. It is the responsibility of the post holder to ensure all duties are covered and attended. Shift patterns vary and maybe subject to change to meet service requirements.
<b>Local education provider (LEP) / employer information</b>	The Royal Surrey NHS Foundation Trust is a leading general hospital and a specialist tertiary centre for Cancer, Oral Maxillo-Facial surgery and Pathology.
