The following points/questions were raised by trainees:

- A question was asked around rotation dates and when they would be due to find out where their next placement would be? CWy advised that [using the portal is helpful and to check with their TPD about when they are most likely to find this out.](#)
- A query was raised around surgery staffing levels at weekends and how it's currently 1 F1 on call at the weekend – feedback has been that it has not been sustainable and causing patient safety concerns. CWy advised to [ensure all patient safety concerns are logged on Datex to highlight this.](#) She also advised to bring this up at the next LAB meeting.

13:00-13:30 Deanery team joins meeting:

LB announced that there is going to be an [Annual Trainee Conference](#) on 5th July and information will be distributed shortly.

CWy noted that the GMC feedback survey is now out, and JS stressed how helpful the survey is in informing the deanery.
