

Based on previous events you have attended, SaySo Medical recommends this course:

You are invited to the 7th Kent ENdoscropy Training immersive and hybrid course on 'Endo-surgical Insight into Colorectal and Oesophageal Submucosal Space'

10th - 12th October 2023

The K.EN.T Endoscropy course has become an extremely popular and prestigious event amongst our UK gastroenterologists and surgeons and has gone from strength to strength over the last six years. It is the **only** endoscropy-surgical training course dedicated to complex colorectal and oesophageal procedures (EMR, ESD/SSD, SCOPE, POEM, G-POEM, Z-POEM, STER, TAMIS), comprising sections with **live lectures, live endoscropy cases, and hands-on experience delivered by our international faculty.**

The 7th K.EN.T Endoscropy course on 'Endo-surgical Insight into Colorectal and Oesophageal Submucosal Space' will take place over two days and is an immersive hybrid event. The programme will consist of lectures, panel discussions, Q&A, live endoscropy, and hands-on experience.

Our international faculty, including **Professor Yutaka Saito (NCCH, Tokyo), Professor Norio Fukami (Mayo Clinic, USA), Professor Gottumukkala Raju (University of Texas MD Anderson Cancer Center, USA), Dr Seiichiro Abe (NCCH, Tokyo)**, will again join our prestigious and well-respected UK national faculty, and we look to surpass all expectations and hence establish a unique National and International training course.

Event details:

Tuesday 10th October | 08:30 - 18:00 (BST)

Wednesday 11th October | 08:00 - 18:00 (BST)
