

Health Education England

Kent, Surrey and Sussex Foundation School Foundation Priority Programmes

Prospectus

August 2024

Kent, Surrey and Sussex Foundation School (KSS)

Foundation Priority Programmes (FPP)

Introduction

Foundation Priority Programmes (FPP) have been developed to support specific areas of the UK that have historically found it difficult to attract and retain doctors in training through the foundation and specialty recruitment processes. The main aim is to maximise the opportunity for applicants who wish to be located to less popular areas and therefore improve supply for specialty training and beyond.

The programmes are advertised and allocated before the main recruitment round, offering applicants more certainty of their geographic location.

Within KSS, there are 8 x 2-year FPPs based in two trusts:

- East Kent NHS Foundation Trust
- East Sussex NHS Foundation Trust

All the FPPs offer additional educational opportunities. The trusts and programmes are described in more detail below.

Additional information can be found on our website at: <https://kss.hee.nhs.uk/kss-foundation/>

East Kent Hospital University NHS Foundation Trust

6 foundation priority programmes.

The Priority Programmes at East Kent Hospitals Trust offers you one of the following:

1. A 50% funded postgraduate online course at F2. Study will be undertaken in the trainee's own time, although trainees may wish to use some of their self-development time for this. We offer the following PG Certs:

a. 1 PG Cert in Medical Education – for example

<https://www.ncl.ac.uk/postgraduate/course/s/degrees/medical-education-mmededpgdip-pgcert/#profile>

b. 1 PG Cert in Digital Health Care – for example

<https://www.cumbria.ac.uk/study/courses/postgraduate/digital-health/>

c. PG Cert in Leadership for Healthcare Improvement – for example

<https://www.derby.ac.uk/postgraduate/nursing-health-care-practicecourses/leadership-for-healthcare-improvement-pgcert/>

2. Offer of 50% funded postgraduate online courses at F2 – for example – introduction to study at Masters level at the University of Kent (worth 15 credits). Study will be undertaken in the doctor's own time or in their self-development time.

<https://store.kent.ac.uk/short-courses/faculty-of-social-sciences/centre-for-professional-practice/introduction-to-masterslevel-study-online-short-course-academicthreshold-concept-parts-1-2-3>

3. Participation in East Kent's Medilead Programme. This is an established leadership development programme and gives trainees the opportunity to undertake a supported Quality Improvement project with QI methodology. The opportunity to engage with hospital leaders and strategy and processes.

East Sussex Healthcare NHS trust

We have two Foundation Priority Programmes and various innovative initiatives to make coming down to the south coast worth the journey.

The foundation doctors in these programmes will have the opportunity to spend 10% of their working week attached to a sub-specialty for which they would not normally have been exposed. Over the two-year period they will develop a core set of skills in one of the following sub-specialties on offer.

Level 1 Emergency

Ultrasound Competencies -

whilst working at ESHT we will offer the opportunity to complete the Level 1 Ultrasound Course, and as a result you will be able to develop an Ultrasound portfolio that will enable you to get your Level 1 competencies signed off. **This specialty applies to Foundation**

Foundation Year 1

Programme Number F1/004P and

Foundation Year 2

Programme Number F2/028P

Pathology – working with the specialty leads to deliver the RCPATH Foundation Fellows Programme curriculum as per the Royal College of Pathologists. **This specialty applies to Foundation**

Foundation Year 1

Programme Number F1/005P and

Foundation Year 2

Programme Number F2/038P.

Leadership Development

As an organisation the development of effective leadership is crucial to first-class patient care and the delivery of effective sustainable services that meet the needs of the local population and national priorities. This is at a time when resources are scarce and demand is increasing.

Foundation Leadership & Management (FLM)

– the FLM course runs over one year and covers the following topics: Self-Awareness & Building Team Relationships, Leadership Styles, Motivating and Leading a Team and Human Factors and Communications. It is run in conjunction with an external organization called *Always Consult*, with the fees paid for via our Apprenticeship Programme.

This programme applies to Standard Foundation Year 1 Programme Numbers-

F1/007, F1/013 & F1/017.

Additionally, this course is offered up to a maximum of 15 FY1 doctors, of which the previously mentioned 3 are included.

Apprenticeships: we will be offering the opportunity to undertake a PG Cert level Apprenticeship in Leadership or Management to support the start of your journey as a future healthcare leader. These are delivered by recognised providers such as Henley Business School and the Open University.

Application: this will be offered to any individual trainee who would like to take up the opportunity.

Quality, Service, Improvement and Redesign (QSIR)

Programme - endorsed by the Institute of Healthcare Management, NHS Improvement and the Royal College of Nursing

QSIR is a practical development programme that will give you the skills and confidence to roll out proven quality and service improvement techniques. QSIR will help support the development of your organisation's improvement capability and capacity by providing you with the know-how to design and implement more efficient and productive services.

The programme will develop your knowledge and skills in:

- Leading Development.
- Project Management
- Measurement for Improvement
- Sustainability of Improvement
- Engaging and Understanding Others
- Creativity and Improvement
- Process Mapping
- Demand and Capacity.

In addition, during your two years with us and as a part of completing this programme you will be working in partnership with a Service Manager (Paired Learning) on a specific project to improve patient care and service delivery. Some of these projects could involve looking at how these QI projects relate and impact on the trainee experience. At the end of your project you will present your joint project to the senior leaders within the Trust.

Application Process: This will be available for 10 individuals to apply to undertake through competitive interview facilitated

jointly with the Transformational Team.

As a Trust we have recently become an Integrated Educational Service and we are working to design, develop and deliver exciting and innovative learning programmes across professional and non-professional roles.

In particular, we are enhancing our Simulation and Human Factors programmes to ensure that we can meet the growing demand for this type of training, which enables teams to learn together in a supported learning environment.

We will be offering six Foundation Year 1 doctors in training the opportunity to undertake the PG Cert in Education over one year, as Foundation Year Two doctors they will work alongside the Education Fellows to design and deliver innovative teaching programmes to Year 4 and 5 medical students.

At the end of year two, four Foundation Year 2 doctors in training, through competitive interview will have the opportunity to undertake a PG Certificate in Simulation in Clinical Practice or a Diploma in Medical Education whilst working in an F3 role will also offered. The learning you achieve will enable us to develop multi-professional programmes that embrace technology to enhance the learning experience as indicated by the *Topol Report* (2019).

Application Process will be through competitive interview.

3b. Provision of additional learning in key topics to include advanced communication, educational, Organisational Development methodologies to include Team Dynamic Theory, Appreciative Enquiry, Change

Management, attendance and support of Schwartz Rounds which are facilitated across the Trust.

Application Process - this will be available to all applicants.

Overview of trust

General Surgery Team

East Sussex Healthcare Trust provides acute hospital and community health services for people living in East Sussex and the surrounding areas.

Our services are mainly provided from two district general hospitals, Conquest Hospital and Eastbourne DGH. Both of which have Emergency Departments and provide care 24 hours a day. They offer a comprehensive range of surgical, medical and maternity services. We have 1000 beds cross site.

We also provide a minor injury unit service from Crowborough War Memorial Hospital, Lewes Victoria Hospital and Uckfield Community Hospital. A midwifery-led birthing service, along with outpatient rehabilitation and intermediate care services are provided at Crowborough War Memorial Hospital.

At both Bexhill Hospital and Uckfield Community Hospital we provide outpatients, day surgery, rehabilitation and intermediate care services.

The Trust is keen to develop its staff and postgraduate medical and nurse training takes place on both the main sites. We have medical students from Brighton & Sussex Medical School, from Kings and elsewhere, and encourage you to develop your teaching skills.

We want to harness your commitment, energy and care to become an organisation that focuses on quality, safety and continuous improvement. We know we need to deliver for today and ever push our standards and expectations higher for tomorrow. We know we all have a shared ambition to deliver the quality of services and care we would want for ourselves and our families and friends. And we want you to enjoy working in an organisation we can be proud of. This remains our goal.

Welcome event - BBQ at Cooden Beach Hotel

Annual Summer Ball - Powdermills Hotel, Battle

Eastbourne DGH

Facilities

Education Centres

Modern, up to date learning resource centres are available on both hospital sites along with many other training opportunities including well equipped skills laboratories at both sites. A planned upgrade and expansion of our facilities is in hand.

Accommodation

Accommodation is available on both sites. Rooms are fully furnished and each flat has a shared kitchen. Utensils are provided. Laundry services are available on both sites. For further information, please contact Medical HR.

Social activities

Both Conquest and Eastbourne hospital have an on-site nursery and the Eastbourne DGH has a social club/bar. The Eastbourne DGH also benefits from an outdoor heated swimming pool. Various social events are held over the year, such as the welcome event for our new FY1s during their shadow week and our Careers evening. This gives the junior doctors an opportunity to network with their future colleagues, education and clinical supervisors, their medical education team, medical HR and existing FY1/FY2 doctors and other support staff relevant to their training needs.

The trainees put together a Summer Ball and winter celebrations, amongst other informal get togethers, such as curry nights, bowling and trainees are encouraged to get involved with our legendary trust Christmas show.

Doctors' mess

The Doctors' Mess on both sites have both been refurbished recently and are very popular.

Foundation doctors both at Eastbourne and the Conquest hold dinners, balls, curry nights and other events. Your membership includes access to the mess day and night, with daily newspapers, SKY TV, snacks and drinks, as well as discounts on social events during the year.

Library facilities

www.esht.nhs.uk/library

IT facilities

Both libraries have internet access 24/7 in their PC rooms. Wi-Fi is also available.

Local amenities/attractions

East Sussex is so much more than a great place to work — it's a stunning place to live and visit.

Hastings is a famous, historical town and seaside resort situated on the south east coast of Britain. Hastings has a castle built by William the Conqueror in the 11th Century, an attractive old town, fishing harbour and seafront. The west of Hastings is modern and lively with a theatre, cinema, many restaurants, bars and clubs, as well as a shopping centre with many well-known shops. There are also many places of interest to visit in the town. More information can be found at www.1066country.com and www.hastings.gov.uk

Eastbourne has many restaurants, pubs and clubs. Famous for its tennis and stunning scenery used in many films. Other picturesque spots include Beachy Head and The Sovereign Harbour. We have 2 cinemas, 10 pin bowling, yachting and surfing clubs, sports centres and theatres. A new shopping centre is currently being built with the addition of another state of the art cinema in the main town. More information can be found at www.eastbourne.gov.uk.

Beachy Head - Eastbourne

Hastings castle

Transport links

The Conquest Hospital (Hastings) is around 60 miles south of London with good transport links with access to Europe via the Eurostar and Channel Tunnel. Regular trains run to London, with an average journey time of 1½ hours. Hastings main rail station is approximately 3 miles from the Hospital.

Government regeneration plans are underway for the Hastings area, and plans are in place for the implementation of a high speed rail network to extend through Hastings from Ashford in Kent, meaning a journey from Kings Cross to Hastings would be reduced to only 68 minutes. A new link road has opened which has reduced traffic congestion and travel time between the two acute hospital sites. A number of new build housing estates are springing up in the area.

Bus travel – www.stagecoachbus.com and www.traveline.org.uk

Train travel – www.nationalrail.co.uk

Eastbourne Rail Station is approximately 1.5 miles from the Hospital. Main line trains from London Victoria run regularly to Eastbourne. Trains from London Victoria are fast and frequent, taking just 80 minutes.

Parking arrangements

There is on-site parking at both hospitals and staff pay £1.50 per day when displaying a staff permit. Monthly (with tax relief) and annual payments can be arranged.

Accolades/achievements of the trust

STFS awarded East Sussex Healthcare NHS Trust a citation for exceptional work in the remediation of Foundation doctors in difficulty.

For information relating to Medical Education events and promotions – please check out our website and dedicated twitter page:

Website: www.esht.nhs.uk/medical-education

The East Sussex Medical Education team host an annual awards event on each site. This gives the opportunity of recognising the achievements of the FY1 and FY2 Doctors and the contribution of their Supervisors and Colleagues, and to thank both groups for their hard work throughout the year. The event is also held to formally recognise the achievement of all the Foundation Doctors with merit certificates from South Thames Foundation School. These are awarded to trainees who as well as having successfully completed their training year at ESHT have done particularly well in the areas of Audit, Learning Portfolio, Teaching and Leadership.

Foundation programme specific information

Induction/shadowing arrangements

At the Eastbourne DGH and Conquest we arrange a formal induction and shadow period for the new FY1s. This helps our trainee doctors to settle in and get used to the hospital. We now also provide the opportunity for our overseas doctors to benefit from an extended additional shadowing period, prior to taking part in formal shadow/Induction at the Trust. Our overseas doctors can also benefit from our Cultural Support Workshops to help them adjust to working in a UK Hospital.

Annual Award Event

The Jevington Ward Team celebrating the opening of the Ambulatory Respiratory Care Space

Our trust website provides full and current information – www.esht.nhs.uk. Please also note our dedicated Medical Education website pages education which hold

specific information relating to our Foundation Programme and more details on the individual specialities you might be interested in, and the types of support you can expect to receive from us, such as Careers advice and pastoral support.

Educational and clinical supervision

We realise that it can be hard to make the transfer from medical student to doctor and endeavour to support our FY1s as much as possible with this transition. We have a trainee support process in place to ensure that help is provided as soon as it is needed.

You will be supported during your 4-month rotation in your specialty of choice, learning key skills that can then be utilised for the rest of your career. Support will be provided by your dedicated educational supervisor, clinical supervisors, your programme lead as well as the larger specialty team. All of whom will give you regular constructive feedback on your progress and what you can do to improve. This will better enable you to deliver core competences from the Foundation curriculum.

Trainee progress is reviewed via the Horus ePortfolio, requiring the trainee to complete set modules by way of:

- Observation
- Direct supervision
- Independent practice
- Attendance at relevant training courses and events

Teaching programme

The programme includes FY1 and FY2 formal weekly teaching sessions, monthly afternoon workshops, directed and self-directed personal learning, structured appraisal and assessments.

The teaching programme covers all aspects of the Foundation Curriculum. Foundation doctors are encouraged to participate in all learning opportunities both in the Education Centres and in clinical settings.

All Foundation Year 1 trainees are attached to a one-year programme. Our Foundation Programme management team consists of two Foundation Training Programme Directors, the Deputy Medical Education Manager who co-ordinates efforts and two Foundation Programme Administrators.

Tasters

These are arranged through the Foundation Administrators and all Foundation Doctors are encouraged to take up the opportunity to participate in taster time in their speciality of interest.

FY1s can request taster sessions during the final rotation of the year.

Simulation

We have fully equipped clinical skills rooms including Simulation suites in both Education Centres and plans are underway to expand our Simulation Programme and facilities.

Both sites run FY1 Simulation Training sessions (a requirement of the curriculum), which have been well received by the FY1 Doctors. FY2 simulation sessions are also run on both sites.

Teaching session

ENT team

Skills room

Foundation doctor forums

We encourage FY1s and FY2s to provide feedback throughout the year both formally and informally.

Trainee representatives for each year are nominated and they attend the Foundation Faculty Group Meeting as representative of their year group.

The FTPDs and Deputy Medical Education Manager also hold individual meetings with the FY1s and FY2s throughout the year to discuss progress and ask for feedback. This trainee feedback is consistently taken into account when we are looking to make improvements to our Foundation Programme. Our aim is to provide a supportive environment where trainees can gain experience through facilitation and encouragement.

Our respective sited Medical Education Team encourage an “open door” policy where trainees are welcome to come and discuss anything relating to their training and post.

Any additional information

During the FY1 year we arrange for you to attend ILS and Simulation Training.

In FY2 we arrange for you to attend ALS and Simulation Training. Study leave for FY2s is available and details will be provided on starting.

There are 35 Foundation Year 1 rotations (FY1). Each rotation comprises 3 x 4-month posts. FY1 doctors may do night shifts, and are rostered for weekends and long days/evening shifts in the acute specialties.

FY1 rotations include General Medicine, Urology, Diabetes, Respiratory, Rheumatology, Cardiology, T&O, General Surgery, Gastroenterology, ITU and Psychiatry. Some posts also include time in the Acute

Assessment Unit. All FY1s are required to work nights in surgery.

FY1s (dependent on their rota and subject to change for each new intake) can be on call.

FY2 rotations include General Medicine, ENT, Palliative Care, Public Health, GP, Paediatrics, Urology, Psychiatry, Ophthalmology, T&O and Cardiology, Elderly Medicine, Respiratory, Diabetes and Emergency Medicine.

The FY2s in ENT are part of the Hospital@Night team in Surgery and work a 1:13 on call. FY2s work in ENT from 0900 – 1700hrs and then any out of hours is with the Hospital@Night team.

All community placements include a day or half a day attachment per week in Emergency Medicine, ITU, MAU and AAU.

It is essential that you have a car for FY2 placements in Public Health (Lewes), Palliative Care, Psychiatry and some General Practice surgeries, which range from urban to rural or more coastal areas.

Due to reconfiguration of our service provision, T&O, Paediatrics and all of our Surgery rotations are based at the Conquest site.
