Specialty	Pathology
Grade	F1
Trust	Maidstone and Tunbridge Wells NHS Trust
Site name and address (include trust name if different to employing trust)	Maidstone Hospital
Type of work to expect and learning opportunities	<p>You will be able to join the team in various branches of Pathology, Histopathology, Chemical Pathology, Haematology and Microbiology.</p> <p>This could be tailored to your specific interests but will include lipid clinics and microbiology ward work/ results service alongside our experienced consultants.</p> <p>You will also have exposure to the Medical Examiner service, dealing with mortality reviews, death certification and autopsy.</p> <p>Typical working pattern: Monday to Friday 9-5 pm, there is also the opportunity to do on call shifts in medicine or surgery.</p> <p>This placement will give you the opportunity to experience areas of medicine that are not always encountered in Foundation Training, and will enable you to understand the important roles of Pathology in patient care.</p> <p><i>Quality improvement:</i> It is anticipated that you will have the opportunity to carry out a quality improvement project.</p> <p><i>Medical student teaching:</i> It is expected that you will have the opportunity to be involved in teaching medical students.</p> <p><i>Education:</i> There is dedicated FY 1 teaching on Tuesday and Thursday at Maidstone. We encourage FY1s to present an interesting case once during their 4-month block.</p> <p>Foundation doctors are also allocated protected Self-Development Time.</p>
Main duties and further information about the placement	Working within specialist Pathology departments as above, taking part in lipid clinics, microbiology and chemical pathology advisory service and ward referrals with consultant microbiologist.

Clinical Supervisor(s) <i>This may be subject to change</i>	Dr Supriya Joshi Each foundation doctor will have a designated consultant as Clinical Supervisor.
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	The typical working pattern is 9am – 5pm, no formal on call rota but the potential to be added to on call medical or surgical rota once appropriately trained.
For further information, please contact the Local Education Provider (LEP) administrative contact	https://kss.hee.nhs.uk/maidstone-prospectus/

It is important to note that this description is a typical example of the placement and may be subject to change

Specialty	Urology
Grade	F1
Trust	Maidstone and Tunbridge Wells NHS Trust
Site name and address (include trust name if different to employing trust)	Maidstone Hospital
Type of work to expect and learning opportunities	You will get experience in a busy Urology Department on the Maidstone Site. There are seven consultants in the department providing urological care including the management of lower urinary tract issues such as prostatic enlargement; stones; prostate, bladder, renal and testicular cancers; incontinence; peno-scrotal pathology; and paediatric urology. This post would be well suited to someone who is interested in a surgical career; or who wishes to gain experience of common urological conditions and the management of surgical patients in general.
Main duties and further information about the placement	<p>You will be one of four FY1s in the Surgical Specialties directorate. The directorate consists of three departments: Urology, Gynae-oncology surgery and Breast Surgery. You will be based in the Urology Department, and this is where the vast majority of your duties will be.</p> <p>You will be responsible with the rest of your team for the day to day management of the patients on the wards, arranging investigations, acting on the results, assessing unwell patients and ensuring appropriate ongoing management. You are supported by a resident doctor (SHO level), registrar of the week and a consultant of the week. There are consultant ward rounds 7 days a week.</p> <p>You will have the opportunity to learn how to do many of the F1 core procedures. You will have allocated sessions to attend clinics, theatre lists and outpatient procedures with your clinical supervisor and we encourage FY1s to attend other sessions when they are able to do so.</p> <p>You will also be expected to supervise and teach medical students.</p>
Clinical Supervisor(s) <i>This may be subject to change</i>	<p>Mr Ian Rudd, Mr Branimir Penev, Mr John Donohue</p> <p>Each foundation doctor will have a designated consultant as Clinical Supervisor. The Urology Department operates a Consultant of the Week system, so the daily supervision changes on a weekly basis.</p>
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	<p>The current working pattern is:</p> <p>Week 1: Monday to Wednesday & Friday 7.45am – 4.30pm On call Saturday & Sunday 8am - 8.30pm</p>

	<p>Week 2: On call Monday 7.45 - 8.30pm Thursday & Friday 7.45am – 4.30pm</p> <p>Week 3: Tuesday to Friday 7.45am – 4.30pm N.B. This will change to a 1 weekend on call in 4 from August 2024. Days not listed = zero days.</p> <p><i>On call requirements:</i> Carrying the F1 bleep. Out of hours ward cover for urology, breast and gynae-oncology patients with support of the respective teams. There is always a urology registrar and RMO on site for support. While on call, you may be asked to assess new patients, which can then be presented to the on- call registrar and/or supervising consultant. On Saturdays there may be an additional gynae-oncology ward round with the consultant surgeon to review any remaining post-op patients.</p> <p><i>Education:</i> There is dedicated FY1 teaching on Tuesday and Thursday at Maidstone. There is urology departmental teaching 8am-9am on Fridays. We encourage FY1s to present an interesting case once during their 4-month block. There is also Surgical Teaching on a Thursday.</p> <p>Foundation doctors are also allocated protected Self-Development Time.</p>
<p>For further information, please contact the Local Education Provider (LEP) administrative contact</p>	<p>https://kss.hee.nhs.uk/maidstone-prospectus/</p>

It is important to note that this description is a typical example of the placement and may be subject to change

It is important to note that this description is a typical example of the placement and may be subject to change

Specialty	Geriatric Medicine - Ortho-Geriatrics
Grade	F1
Trust	Maidstone and Tunbridge Wells NHS Trust
Site name and address (include trust name if different to employing trust)	Tunbridge Wells Hospital at Pembury
Type of work to expect and learning opportunities	You will get experience in a busy Orthopaedic Department, working both with the Consultant Ortho- Geriatricians in the post-operative management of elderly patients with fractures, as well as getting some experience of both elective orthopaedics and trauma care. You will get a high degree of supervision. You will get the opportunity to follow patients with fractures requiring surgical intervention into theatres.
Main duties and further information about the placement	<p>You will be working as one of two FY1 doctors based in the Department of Trauma and Orthopaedics, working closely with the Ortho-Geriatricians, but you will also gain some experience in both theatres and the A&E department. You are supervised at all times during this placement, working alongside the 10 FY2 and 2 IMT foundation doctors in the Department. You will take your share of arranging investigations, acting on the results and arranging discharge arrangements for patients.</p> <p>FY1's are also involved in the Medical On-call rota, doing weekend On-calls, but not night shifts.</p> <p>You may also be expected to supervise and teach a Medical Student.</p>
Clinical Supervisor(s) <i>This may be subject to change</i>	<p>Dr Chee Soo, Dr Claire Hunt, Dr Katy Davies</p> <p>Each foundation doctor will have a designated Clinical Supervisor who is a Consultant Ortho-Geriatrician, but will have an additional linked Consultant Orthopaedic Surgeon supervising. This may change as the Department operates a Consultant of the week system.</p>

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	General Internal Medicine – Cardiology
Grade	F1
Trust	Maidstone and Tunbridge Wells NHS Trust
Site name and address (include trust name if different to employing trust)	Tunbridge Wells Hospital at Pembury
Type of work to expect and learning opportunities	You will get experience of the General Internal Medicine taking part in the Acute unselected medical on-call, and you will spend at least two weeks during your 4-month placement on the Medical Assessment Unit. You will be ward based for most of your remaining work, working on Ward 12, which gives experience in the management of the acute general medical problems and cardiac problems. The Cardiology team help to manage patients with cardiac problems throughout the Hospital.
Main duties and further information about the placement	<p>You will be working as one of two FY1 doctors on this placement, alongside two IMT doctors and two registrars. You will have a high degree of support during this placement. You will be responsible with the rest of your team for the day to day management of the patients with cardiac problems, taking your share of arranging investigations, acting on the results and arranging discharge arrangements.</p> <p>While on the acute medical take and while placed on MAU, you will be expected to make the primary assessment of patients referred to the medical on-call team and present them on to the supervising consultant. You will have the opportunity to learn how to do many of the practical procedures expected of a FY1 doctor working in Medicine.</p> <p>The Cardiologists operate a Consultant of the week system with daily ward rounds of cardiac patients starting on CCU at 8am. In the afternoons you will also be asked to help see elective admissions coming in for cardiac procedures.</p> <p>You may also be expected to supervise and teach a Medical Student.</p>
Clinical Supervisor(s) <i>This may be subject to change</i>	<p>Dr Kuno Budack, Dr Timothy Williams, Dr Derek Harrington, Dr Vinay Bhatia, Dr Smitha Pulapalli, Dr Clive Lawson</p> <p>Each foundation doctor will have a designated Clinical Supervisor.</p>

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Research/ Leadership/ Education – Cardiovascular Medicine (Specialist Foundation Programme)
Grade	F2
Trust	Maidstone and Tunbridge Wells NHS Trust
Site name and address (include trust name if different to employing trust)	Maidstone Hospital
Type of work to expect and learning opportunities	<p>You will work in a busy Cardiology Department (with complex pacing/ EPS/intervention and echo facilities), specifically looking at leadership and service improvement projects and education of Junior Doctors and Medical Students for this unit.</p> <p>Successful applicants are recruited to a specific 4-month Academic F2 post. This post sits within a generic 2-year Foundation Programme with five other clinical placements, balanced to enable acquisition of foundation competences.</p>
Main duties and further information about the placement	<p>The department is expanding and you will be able to develop teaching and training facilities within this expansion and also in relation to the general medical unit. This could include simulation, development of clinical reasoning, technology-based learning, bedside and ward round teaching. The increased number of Medical Students will also give the opportunity to enhance teaching and set up a programme devised for them.</p> <p>You will be supervised by a Consultant with a specific leadership/educational role and with links to the Kent and Medway Medical School.</p> <p>We will support you in obtaining a PGCert in medical education.</p> <p>Projects (if applicable) - Leadership/service improvement project alongside the cardiology clinical lead with the chance to shadow members of the Trust Board, educational impact project with evidence gathering and presentation of findings at a national meeting if possible.</p> <p>Departmental academic teaching programme (if applicable) - The aim is to improve upon the existing teaching and MDT programmes within the department and provide a comprehensive teaching plan for the general medical juniors delivered as part of external programmes (such as grand rounds and mandatory foundation teaching) and also to develop specific cardiology teaching/training programmes within the unit with the supervision of a</p>

	consultant. Develop an undergraduate teaching programme for cardiology.
Clinical Supervisor(s) <i>This may be subject to change</i>	Dr Timothy Williams You will be supervised by a Consultant with a specific leadership/educational role and with links to the Kent and Medway Medical School.
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	Clinical commitments will fit around the educational/leadership projects, to take part in general cardiology ward care as agreed with your supervisor, for instance to help identify patients suitable for teaching or those to be referred to MDTs (no formal minimum commitment), no on call rota but you will be able to take on some on call commitments as part of the bank rota in medicine or surgery again as appropriate. <i>Education:</i> There is dedicated FY2 teaching programme on Thursday in Maidstone. Foundation doctors are also allocated protected Self-Development Time.
For further information, please contact the Local Education Provider (LEP) administrative contact	https://kss.hee.nhs.uk/maidstone-prospectus/

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Research/ Leadership/ Education – Oncology (Specialist Foundation Programme)
Grade	F2
Trust	Maidstone and Tunbridge Wells NHS Trust
Site name and address (include trust name if different to employing trust)	Maidstone Hospital
Type of work to expect and learning opportunities	We have a large regional Oncology Centre which has an established research portfolio and a newly developing Cardiovascular Unit. You will be able to take part in research in one or both, supported by our specialist research team and senior consultants/lecturers.
Main duties and further information about the placement	<p>Foundation doctors will undertake a four-month specialist research placement in F2 as part of a two-year Foundation Programme. The F1 programme is as standard, though you may be asked to consider your research options and attend some study dates.</p> <p>You will work alongside an established research team in either oncology or cardiovascular sciences, taking part in all aspects of clinical research and learning about the processes involved in setting up a research project. You will be expected to present your work at regional meetings and at a national conference if appropriate. Although the research component is 4 months of the two year programme you will be expected to engage with the research unit from the start and will have a supervisor assigned so that you can start to develop any ideas/interested that would help with the research placement and allow you to start that seamlessly.</p> <p>Maidstone Hospital is the main Haematology/Oncology Centre for Kent and has a thriving and established research department supported by a team of nurses.</p> <p>We will support you in obtaining a PGCert in medical education.</p>
Clinical Supervisor(s) <i>This may be subject to change</i>	<p>Dr Karina Cox</p> <p>You will be supervised by a Consultant with a specific leadership/educational role and with links to the Kent and Medway Medical School.</p>
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	There is no minimum clinical commitment but you will take part in the clinical workload of the department to facilitate your research project, for instance to identify patients for studies, usual working hours will be 9-5 Monday to Friday. There is no formal rota commitment for the 4-month

	<p>research period but you will have the opportunity to join the medical/ surgical rota bank if appropriate.</p> <p>You will take part in departmental research and will be supported in setting up your own project, there will be support during your FY1 general year to start thinking about the project in the FY2 year and begin preparation. We would expect you to aim to present your project and to write up suitable copy for publication if appropriate.</p> <p><i>Education:</i> There is dedicated FY2 teaching programme on Thursday in Maidstone.</p> <p>Foundation doctors are also allocated protected Self-Development Time.</p>
<p>For further information, please contact the Local Education Provider (LEP) administrative contact</p>	<p>https://kss.hee.nhs.uk/maidstone-prospectus/</p>

It is important to note that this description is a typical example of the placement and may be subject to change

Specialty	General (Internal) Medicine – Perioperative Medicine
Grade	F2
Trust	Maidstone and Tunbridge Wells
Site name and address (include trust name if different to employing trust)	Tunbridge Wells Hospital
Type of work to expect and learning opportunities	<p>The job of an FY2 on a daily basis is predominately administrative and being extremely organised is the key to being successful.</p> <p>You will get experience in a busy department and gain experience in the assessment and management of patients with a variety of medical conditions. You will get a high degree of supervision and gain experience in practical procedures.</p> <p>Pre-operative clinical assessments, Peri-operative theatre exposure i.e. scrubbing in and assisting the surgeon in theatre, post-operative patient care-Ward work, On-call surgical rota with a larger exposure to other surgical disciplines with acute surgical admission and emergencies. MDT preparation and presentation weekly.</p> <p>You will also be working on the GIM On-call rota.</p> <p><i>Education:</i> There is dedicated FY2 teaching programme on Thursday.</p> <p>You will also be able to teach medical students.</p>
Main duties and further information about the placement	<p>Foundation doctors will undertake a four-month placement in a busy department.</p> <p>Having an updated inpatient list for ward rounds and other members of the team. This should include, reason for patients admission, diagnosis, investigation results and plan. There should also be a column for any further jobs that may need implementing to ensure jobs that may arise during ward round are completed and results chased up. If a review from another speciality has been requested, it is important you act upon their recommendations if appropriate.</p>

	<p>You are the first port of call for any patient on the ward, therefore if a patient becomes acutely unwell you will be contacted first. It is important to be aware that there is help available from your other team members and you should always ask for it if you feel you are not able to cope.</p> <p>Also, you may be asked to speak to family members about the patient's condition.</p> <p>At Tunbridge Wells hospital, you are required to conduct pre-assessment clinics for elective operations. Here, you assess the fitness for surgery for each patient and to discuss any uncertainties with the anaesthetist. This is an effective learning environment if you get complicated patients.</p> <p>You are expected to do one on-call ever 3-4weeks, probably the best learning opportunity available to practice history taking, examination and procedural skills. Again, whilst on-call you are expected to attend to patients who have been admitted under your take if they become acutely unwell and also attend to any new incoming patients.</p>
<p>Clinical Supervisor(s) <i>This may be subject to change</i></p>	<p>Dr Katy Davies</p> <p>Each foundation doctor will have a designated Clinical Supervisor.</p>
<p>Typical working pattern in the placement. e.g. ward rounds, clinics, theatre</p>	<p>Ward rounds, multi-disciplinary meetings and on-calls. Full supervision at all times with 2-3 Consultant Ward rounds a week.</p> <p><i>Education:</i> There is dedicated FY2 teaching programme on Thursday in Maidstone.</p> <p>Foundation doctors are also allocated protected Self-Development Time.</p>
<p>For further information, please contact the Local Education Provider (LEP) administrative contact</p>	<p>https://kss.hee.nhs.uk/tunbridge-wells-prospectus/</p>

Specialty	General Internal Medicine – Perioperative Medicine
Grade	F2
Trust	Maidstone and Tunbridge Wells NHS Trust
Site name and address (include trust name if different to employing trust)	Tunbridge Wells Hospital at Pembury
Type of work to expect and learning opportunities	<p>The job of an FY2 on a daily basis is predominately administrative and being extremely organised is the key to being successful.</p> <p>You will get experience in a busy department and gain experience in the assessment and management of patients with a variety of medical conditions. You will get a high degree of supervision and gain experience in practical procedures.</p> <p>Pre-operative clinical assessments, Peri-operative theatre exposure i.e. scrubbing in and assisting the surgeon in theatre, post-operative patient care-Ward work, On-call surgical rota with a larger exposure to other surgical disciplines with acute surgical admission and emergencies. MDT preparation and presentation weekly.</p> <p>You will also be working on the GIM On-call rota.</p> <p><i>Education:</i> There is dedicated FY2 teaching programme on Thursday.</p> <p>You will also be able to teach medical students.</p>
Main duties and further information about the placement	<p>Foundation doctors will undertake a four-month placement in a busy department.</p> <p>Having an updated inpatient list for ward rounds and other members of the team. This should include, reason for patient admission, diagnosis, investigation results and plan. There should also be a column for any further jobs that may need implementing to ensure jobs that may arise during ward round are completed and results chased up. If a review from another speciality has been requested, it is important you act upon their recommendations if appropriate.</p> <p>You are the first port of call for any patient on the ward, therefore if a patient becomes acutely unwell you will be contacted first. It is important to be aware that there is help available from your other team members and you should always ask for it if you feel you are not able to cope.</p>

	<p>Also, you may be asked to speak to family members about the patient's condition.</p> <p>At Tunbridge Wells hospital, you are required to conduct pre-assessment clinics for elective operations. Here, you assess the fitness for surgery for each patient and to discuss any uncertainties with the anaesthetist. This is an effective learning environment if you get complicated patients.</p> <p>You are expected to do one on-call ever 3-4 weeks, probably the best learning opportunity available to practice history taking, examination and procedural skills. Again, whilst on-call you are expected to attend to patients who have been admitted under your take if they become acutely unwell and also attend to any new incoming patients.</p> <p>Foundation doctors are also allocated protected Self-Development Time.</p>
<p>Clinical Supervisor(s) <i>This may be subject to change</i></p>	<p>Dr Katy Davies</p>
<p>Typical working pattern in the placement. e.g. ward rounds, clinics, theatre</p>	<p>Ward rounds, multi-disciplinary meetings and on-calls. Full supervision at all times with 2-3 Consultant Ward rounds a week.</p>
<p>For further information, please contact the Local Education Provider (LEP) administrative contact</p>	<p>https://kss.hee.nhs.uk/tunbridge-wells-prospectus/</p>
