****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	General Psychiatry
Grade	F1
Trust	University Hospitals Sussex NHS Foundation Trust (West)
Site name and address (include trust name if different to employing trust)	Oaklands Centre, Oaklands Centre For Acute Care, Graylingwell Drive, Chichester, West Sussex, PO19 6GS
Type of work to expect and learning opportunities	
Main duties and further information about the placement	<p>This is a FY post based at Oaklands Ward, Oaklands Centre for Acute Care, Graylingwell Drive, Chichester, P019 6GS</p> <p>Sussex Partnership NHS Foundation Trust provides an Ageless Service and experience of the over '65 is available.</p> <p>This is a 4 month placement, as part of the Year 1 KSS Foundation School training programme.</p> <p>This is an exciting opportunity to join a busy multidisciplinary team working with the full gamut of mental health problems, primarily in the community. You will join a team of Community Psychiatric nurses, Occupational Therapists, Psychologists, Support Workers, Administration Staff and Doctors.</p> <p>This new post is part of the recent expansion of the Foundation Programme with the addition of extra opportunities for community, integrated and psychiatric experience. As a result, it is designed to allow the doctor to follow the patient through their whole care pathway, from Primary Care referral, first assessment, follow up in the community, admission in Mental Health Unit or care under Crisis Team to the point of transfer back to Primary Care, and have opportunities to liaise with or shadow non-NHS agency involvement, e.g. Social Services, Third Sector and Accommodation Providers.</p> <p>The majority of patients suffer chronic and recurrent unstable psychoses, a wide variety of affective and neurotic disorders and personality disorder. There is fast turnover and heavy referral rate, and multidisciplinary/multiagency work and liaison with Primary Care is emphasised. Although crisis resolution and emergency work is not core component of the service, there is frequent interface with the acute parts of the pathway, and the occasional emergency intervention and Mental Health Act work does occur when it is in the interests of service users. It is anticipated that the doctor will have opportunities to visit other related services, including other community bases, GP practices, psychiatric inpatient units and the local Acute Hospital, so that they keep in contact with their peer group and have as broad experience as possible.</p>

<p>Clinical Supervisor(s) <i>This may be subject to change</i></p>	<p>The doctor will always have direct access to an appropriate senior colleague for advice in any clinical situation. In most situations between 9:00-17:00 this will be the Consultant of the team, who will also act as the clinical supervisor for training and quality assurance purposes and will offer on average one hour per week direct face to face clinical supervision.</p> <p>On occasion this senior person may be a non-doctor competent to supervise and advise on the relevant activities. When working out of hours (on-call), there is always an arrangement where an inpatient MDT, Liaison Service, Senior Nurse Practitioner and more experienced doctors and/or a Consultant will be available for this supervision and advice, either on the phone or on-site.</p>																		
<p>Typical working pattern in the placement. e.g ward rounds, clinics, theatre</p>	<p>Indicative Timetable</p> <table border="1" data-bbox="555 741 1410 1106"> <thead> <tr> <th></th> <th>Monday</th> <th>Tuesday</th> <th>Wednesday</th> <th>Thursday</th> <th>Friday</th> </tr> </thead> <tbody> <tr> <td>a.m.</td> <td>MDT ward reviews</td> <td>MDT ward reviews</td> <td>MDT ward reviews</td> <td>Supervision, MDT reviews & ward work</td> <td>MDT reviews & clinical supervision</td> </tr> <tr> <td>p.m.</td> <td>Ward work</td> <td>Foundation programme training, St Richard's Hospital</td> <td>Balint group & academic programme</td> <td>Ward work</td> <td>Ward work</td> </tr> </tbody> </table>		Monday	Tuesday	Wednesday	Thursday	Friday	a.m.	MDT ward reviews	MDT ward reviews	MDT ward reviews	Supervision, MDT reviews & ward work	MDT reviews & clinical supervision	p.m.	Ward work	Foundation programme training, St Richard's Hospital	Balint group & academic programme	Ward work	Ward work

Specialty	General Psychiatry
Grade	F1
Trust	University Hospitals Sussex NHS Foundation Trust (West)
Site name and address (include trust name if different)	The Chichester Centre, Graylingwell Drive, Chichester PO19 6GS / Oaklands Centre, Graylingwell Drive, Chichester PO19 6GS
Type of work to expect and learning opportunities	<p>The post holder's work will involve attending ward rounds, clerking admission and writing discharge summaries under supervision. You will be well supported by the supervising consultants and MDT. Attending the local academic programme on Wednesdays is essential.</p> <p>The duties of the post may include</p> <ul style="list-style-type: none"> To provide high quality clinical assessment, including relevant psychiatric and physical investigation To plan and deliver appropriate individually tailored treatment plans in conjunction with other members of the multidisciplinary team To regularly review and monitor patients' treatment progress (including physical health and results of physical/laboratory investigations) To take part as facilitator in therapeutic groups and receive supervision for this from appropriate qualified clinical psychologists and other experienced members of the team To keep accurate, appropriate and up-to-date medical records To liaise closely with other relevant professionals and organisations including the Ministry of Justice, MAPPA, other non-statutory services, adult psychiatric services, CAMHS, GPs, Education and Prison Services To operate within guidelines, policies and procedures relevant to the post To provide clinical advice, liaison and consultation as required to colleagues in primary care, community services and acute specialities, under supervision When necessary, covering duties of the colleagues and other junior medical staff, in order to ensure continuity of medical care, including willingness to supervise a Foundation Doctor and offer advice and consultations to other professionals in the team

<p>Main duties and further information about the placement</p>	<p>This is a 4-month placement, as part of the Foundation Training programme, which is split between Oaklands Centre (2 days), Chichester and the Forensic Healthcare Service based at Chichester Centre Low Secure Unit (2 days).</p> <p>The Chichester Centre The Chichester Centre comprises three low secure forensic wards: Fir (male admissions/treatment); Pine (male rehabilitation); Hazel (female low secure). The post will be attached primarily to Hazel Ward although there will be an expectation that you will also acquire experience across the other wards providing cross cover to these as appropriate.</p> <p>The post holder will join a full multidisciplinary team including ward manager, nursing staff, occupational therapists, a psychologist, social work support and administrative support. The medical team on Hazel Ward consists of two part time Consultant Forensic Psychiatrists (one of whom will act as Clinical Supervisor),</p> <p>Visits can be arranged to HMP Lewes, Broadmoor Hospital, The Hellingly Centre (Medium Secure Unit) and court, as well as experience of Forensic cases in Mental Health Review Tribunals. These will take priority over routine duties.</p> <p>The post holder will have the opportunity to join the West Sussex Community Forensic Outreach Team (CFOT) which provides case management for a group of community patients considered to pose specific challenges to services, including heightened risk of aggression/violence, and considered in need of specialist risk assessment and management. The majority of patients will be discharged from secure units and will be subject to Section 41 of the Mental Health Act 1983.</p> <p>Oaklands Centre This post will provide the F1 with experience in inpatient work on an acute mental health unit. The philosophy of the Acute Services as a whole is one of empowerment for the individual, aiming to establish a partnership with patients and carers so that they can make informed decisions about the management of their illness. In-patient services in Chichester, for people of working age, are based at the Oaklands Centre for Acute Care, a newly refitted 16 bedded in-patient unit. The aim is to admit patients only when their needs cannot be met by these community-based services. Apart from the patients admitted from the working age teams, the ward is the admission unit for Early Intervention Service for Psychosis (EIS) patients, Learning difficulty (LD) patients and Assertive Outreach Team (AOT) /rehab patients for the Western locality. Patients who need special care PICU are admitted to Langley Green Hospital. The post provides exposure to a wide variety of interesting clinical presentations and offers the opportunity to interface with non inpatient specialist team workers. Good liaison with carers, community and specialist teams is clearly paramount. You would be working with a dynamic and creative team, which includes enthusiastic Nursing Staff, OT, Ward Pharmacist, and Psychologist.</p>

Specialty	General Psychiatry
Grade	F2
Trust	University Hospitals Sussex NHS Foundation Trust (West)
Site name and address (include trust name if different to employing trust)	Drayton House
Type of work to expect and learning opportunities	
Main duties and further information about the placement	<p>This is a FY2 post based at Drayton House, Drayton Rd, Chichester</p> <p>This is a 4 month placement, as part of the Year 2 KSS Foundation School training programme.</p> <p>This is an exciting opportunity to join a busy multidisciplinary team working with the full gamut of mental health problems, primarily in the community and in St Richards Hospital. You will join a team of Community Psychiatric nurses, Occupational Therapists, Psychologists, Support Workers, Administration Staff and Doctors.</p> <p>This new post is part of the recent expansion of the Foundation Programme with the addition of extra opportunities for community, integrated and psychiatric experience. As a result, it is designed to allow the doctor to follow the patient through their whole care pathway, from Primary Care referral, first assessment, follow up in the community, admission in Mental Health Unit or care under Crisis Team to the point of transfer back to Primary Care, and have opportunities to liaise with or shadow non-NHS agency involvement, e.g. Social Services, Third Sector and Accommodation Providers.</p> <p>The majority of patients suffer chronic, stable psychosis, a wide variety of affective and neurotic disorders, cognitive disorders and personality disorder. There is fast turnover and heavy referral rate, and multidisciplinary/multiagency work and liaison with Primary Care is emphasised. Crisis resolution and emergency work is a core component of the Intensive Support service, and there is frequent interface with the acute parts of the pathway. Occasional emergency intervention and Mental Health Act work does occur when it is in the interests of service users. It is anticipated that the doctor will have opportunities to visit other related services, including other community bases, GP practices, psychiatric inpatient units and the local Acute Hospital, so that they keep in contact with their peer group and have as broad experience as possible.</p>
Clinical Supervisor(s) <i>This may be subject to change</i>	<p>The doctor will always have direct access to an appropriate senior colleague for advice in any clinical situation. In most situations between 9:00-17:00 this will be the Consultant of the team, who will also act as the clinical supervisor for training and quality assurance purposes and will offer on average one hour per week direct face to face clinical supervision.</p> <p>On occasion this senior person may be a non-doctor competent to supervise and advise on the relevant activities. When working out of hours (on-call), there is always an arrangement where an inpatient MDT, Liaison Service, Senior Nurse Practitioner and more experienced doctors and/or a Consultant will be available for this supervision and advice,</p>

It is important to note that this description is a typical example of the placement and may be subject to change

Specialty	General Psychiatry
Grade	F2
Trust	University Hospitals Sussex NHS Foundation Trust (West)
Site name and address (include trust name if different to employing trust)	Drayton House, Chichester
Type of work to expect and learning opportunities	<p>The duties of the post may include</p> <ul style="list-style-type: none"> To provide high quality clinical assessment, including relevant psychiatric and physical investigation To plan and deliver appropriate individually tailored treatment plans in conjunction with other members of the multidisciplinary team To regularly review and monitor patients' treatment progress (including physical health and results of physical/laboratory investigations) To take part as facilitator in therapeutic groups and receive supervision for this from appropriate qualified clinical psychologists and other experienced members of the team To keep accurate, appropriate and up-to-date medical records To liaise closely with other relevant professionals and organisations including the Ministry of Justice, MAPPA, other non-statutory services, adult psychiatric services, CAMHS, GPs, Education and Prison Services To operate within guidelines, policies and procedures relevant to the post To provide clinical advice, liaison and consultation as required to colleagues in primary care, community services and acute specialities, under supervision When necessary, covering duties of the colleagues and other junior medical staff, in order to ensure continuity of medical care, including willingness to supervise a Foundation Doctor and offer advice and consultations to other professionals in the team

<p>Main duties and further information about the placement</p>	<p>This is a 4-month placement, which is split between Oaklands Centre and the Forensic Healthcare Service based at Chichester Centre Low Secure Unit.</p> <p>The Chichester Centre The Chichester Centre comprises three low secure forensic wards: Fir (male admissions/treatment); Pine (male rehabilitation); Hazel (female low secure). The post will be attached primarily to Pine Ward although there will be an expectation that you will also acquire experience across the other wards providing cross cover to these as appropriate.</p> <p>The post holder will join a full multidisciplinary team including ward manager, nursing staff, occupational therapists, a psychologist, social work support and administrative support. The medical team on Hazel Ward consists of two part time Consultant Forensic Psychiatrists (one of whom will act as Clinical Supervisor),</p> <p>Oaklands Centre This post will provide the GPST with experience in inpatient work on an acute mental health unit.</p> <p>The philosophy of the Acute Services as a whole is one of empowerment for the individual, aiming to establish a partnership with patients and carers so that they can make informed decisions about the management of their illness. In-patient services in Chichester, for people of working age, are based at the Oaklands Centre for Acute Care, a newly refitted 16 bedded in-patient unit. The aim is to admit patients only when their needs cannot be met by these community-based services. Apart from the patients admitted from the working age teams, the ward is the admission unit for Early Intervention Service for Psychosis (EIS) patients, Learning difficulty (LD) patients and Assertive Outreach Team (AOT) /rehab patients for the Western locality. Patients who need special care PICU are admitted to Langley Green Hospital.</p> <p>The post provides exposure to a wide variety of interesting clinical presentations and offers the opportunity to interface with non inpatient specialist team workers. Good liaison with carers, community and specialist teams is clearly paramount. You would be working with a dynamic and creative team, which includes enthusiastic Nursing Staff, OT, Ward Pharmacist, and Psychologist.</p> <p>Psychiatric patients have significantly increased morbidity and decreased life expectancy, this may be related to a combination of factors including poor diet, alcohol misuse, smoking and lifestyle choices. We are implementing a process of health checks and monitoring. The F1 will work with the team to ensure that all appropriate physical health checks have been carried out using NEWS. The F1 role may be further developed with ward staff to deliver tailored individualised health education, which may include advice on smoking cessation, safe use of alcohol, healthy eating etc.</p>
<p>Clinical Supervisor(s) <i>This may be subject to change</i></p>	<p>Dr Darren Cotterel</p>

<p>Typical working pattern in the placement. e.g ward rounds, clinics, theatre</p>	<p>Indicative Timetable: Subject to change</p>
