For further information, please contact the Local Education Provider (LEP) administrative contact	https://kss.hee.nhs.uk/kent-and-canterbury-prospectus/

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Cardiology
Grade	F1
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	This post is part of a Kent & Canterbury Hospital programme but is <u>based at William Harvey Hospital</u>, Kennington Rd, Willesborough, Ashford, TN24 0LZ (for this rotation only).
Type of work to expect and learning opportunities	Type of work to expect would be as follows: Prepping for days ward round, clerking patients, interpreting investigations - bloods, VBG/ABG, ECG, Echocardiogram. Some cardiology specific jobs are referrals for London based Joint Cardiology meetings regarding surgical procedures such as CABG, TAVI, valve replacement. Assisting with common ward-based jobs such as catheterisation, venepuncture, ABG, cannulation (though these are all often well carried out by nursing team except ABG).
Main duties and further information about the placement	As above. Mainly on Bartholomew ward (where patients have AF/ HF/ NSTEMI/IE) but also time on CCU where most patients have had a STEMI but there may be patients with ventricular arrhythmias or shock.
Clinical Supervisor(s) <i>This may be subject to change</i>	Dr Harding Dr Fisher
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	8:30 -18:00 Monday to Friday (with interruptions for teaching and lunch) During GIM HOT blocks works long (13 hr) days with compensatory zero days. Work about 1 in 6 weekends (ward cover – not always on cardiology) or Acute GIM take, with compensatory zero days Monthly self-development days
For further information, please contact the Local Education Provider (LEP) administrative contact	https://kss.hee.nhs.uk/kent-and-canterbury-prospectus/

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Emergency Medicine
Grade	F1
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	This post is part of a Kent & Canterbury Hospital programme but is based at William Harvey Hospital, Kennington Rd, Willesborough, Ashford, TN24 0LZ (for this rotation only)
Type of work to expect and learning opportunities	Fully supervised assessment and management of acutely ill patients. Involvement in managing resus patients and minor injuries. Opportunities to learn and improve history taking, examination and management skills. Learn and practice minor procedures ranging from cannulation to suturing. Exposure to EMUS (Emergency Medicine Ultrasound). Dedicated
Main duties and further information about the placement	Assessing and managing patients in the A&E areas such as Resus, RAT, Majors Assessment and Paediatric ED
Clinical Supervisor(s) <i>This may be subject to change</i>	Dr Gilani
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	8am-4pm shift, Monday to Friday. A&E Teaching on Tuesday afternoons. Most of the day spent in Majors with occasional opportunity to go to minor injuries or resus.
For further information, please contact the Local Education Provider (LEP) administrative contact	https://kss.hee.nhs.uk/kent-and-canterbury-prospectus/

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Gastroenterology Medicine
Grade	F1
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	This post is part of a Kent & Canterbury Hospital programme but is based at William Harvey Hospital, Kennington Rd, Willesborough, Ashford, TN24 0LZ (for this post only).
Type of work to expect and learning opportunities	<ul style="list-style-type: none"> - Reviewing and managing patients (supervised and independently) on the gastroenterology ward - Preparing for ward rounds, documenting in patients notes, or making referrals or imaging requests - Approx. 4 weeks on-call in a single period called Hot-block; this working pattern is typically 2 days on, 2 days off, 3 days on, 3 days off.
Main duties and further information about the placement	<ul style="list-style-type: none"> - Preparation of patients notes, documenting for ward Rounds - Requesting and taking bloods - Requesting investigations - Making referrals to other specialties - Clerking new patients (e.g. admitted from endoscopy) - Prescribing common medications and fluids - Preparing discharge summaries
Clinical Supervisor(s) <i>This may be subject to change</i>	Dr Austin Dr de Berry
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	08.45 - Board round with nurse in charge and medical team 09.15 onwards - ward rounds (supervised) happen every day and typically finish between 12:00 & 15:00. Afternoons are spent carrying out jobs arising from ward rounds and acute/immediate issues
For further information, please contact the Local Education Provider (LEP) administrative contact	https://kss.hee.nhs.uk/kent-and-canterbury-prospectus/

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Geriatric Medicine - Post Operative Medicine for Older People (POPS)
Grade	F1
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Kent and Canterbury Hospital, Ethelbert Road, Canterbury, CT1 3NG
Type of work to expect and learning opportunities	<p>During this attachment, you will be well supported both clinically and educationally, with lots of opportunities to learn and develop skills in perioperative medicine and generic medicine essential for your ongoing career. During this placement you will have the opportunity to gain experience in the medical management of patients undergoing surgery. As you will be aware, treating older adults is uniquely challenging in terms of managing multimorbidity, as well as needing to understand rehabilitation and discharge planning. You will be working as part of a multidisciplinary team (surgical, anaesthetic and therapy teams) which is a model which enables collaborative and holistic treatment of older surgical patients. Much of what you will learn during this attachment is directly linked to the foundation programme curriculum.</p>
Main duties and further information about the placement	<p>We are a geriatrician-led multidisciplinary team that provides care to older or complex elective and emergency surgical patients throughout their surgical pathway. The team consists of: 2 consultant geriatricians, 1 middle grade doctor, 1 foundation doctor, 4 CNS, 1 OT (less than full time), 1 PT and 1 administrator. We work across vascular, urology, elective orthopaedic in Canterbury Hospital and general surgical patients in QEOM. Our clinical workload consists of preoperative assessment and optimisation of older surgical patients with follow up through the pathway, providing ward based medical care, multidisciplinary rehab goal setting and discharge planning. This involves collaborative working with surgeons, anaesthetists, patients, and their families.</p> <p>The foundation doctor roles are divided into:</p> <ul style="list-style-type: none"> a) Ward-based in-patient care b) Out-patient c) No on-call commitment – but you can pick up on-call shifts if desired, particularly in vascular/urology.
Clinical Supervisor(s) <i>This may be subject to change</i>	Dr. Thomas Bell
Typical working pattern in the placement. e.g.	We adhere to the European Working Time Directive (EWTD) in the POPS service. We do not expect you to stay

ward rounds, clinics, theatre	<p>beyond the timetabled working hours. We expect you to take natural breaks as appropriate during the working day. If this is not happening, it is your responsibility to raise this immediately with your clinical and/or educational supervisor and to document this discussion. This is very important so that we can support you in having a fulfilling attachment with the POPS team. You should complete exception reports as necessary.</p> <p>Handover is an inevitable part of any medical job. In particular, you will need to hand over any outstanding tasks for clinic patients when you leave the POPS role or before annual leave (AL). Please ensure you hand over to the person coming in your place. Email is usually best, with the consultant copied in.</p>
For further information, please contact the Local Education Provider (LEP) administrative contact	https://kss.hee.nhs.uk/kent-and-canterbury-prospectus/

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Psychiatry
Grade	F1
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Host Organisation: Kent and Medway Mental Health NHS Trust Base: St Martin's Hospital, Littlebourne Road, Canterbury CT1 1TD (NPN - KSS/RVV01/052/F1/004)
Type of work to expect and learning opportunities	Older adult mental health, mainly inpatient care (4 days a week) and partly clinic/community work (2 half-days or 1 day a week).
Main duties and further information about the placement	Assessment of inpatients and community patients with mental illness or memory impairment. Joint working with supportive MDTs. Use of electronic record systems for clerking/updating/prescribing treatments/TTOs/EDNs The inpatient ward (Heather Ward) and community mental health team (Gregory House) are co-located on the St Martin's Hospital site in Canterbury.
Clinical Supervisor(s) <i>This may be subject to change</i>	Dr Bastiaan Veugelers
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	Work is 09:00 – 17:00, Monday to Friday. Daytime timetable to be provided by Consultant Supervisor. No on-call rota. Maximum working hours = 40
For further information, please contact the Local Education Provider (LEP) administrative contact	https://kss.hee.nhs.uk/kent-and-canterbury-prospectus/

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Renal Medicine
Grade	F1
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Kent and Canterbury Hospital, Ethelbert Road, Canterbury, CT1 3NG
Type of work to expect and learning opportunities	<p>A typical working day starts with the MDT morning board round at 08:30 am, followed by the ward round at 09:00 am. The F1 doctor is expected to update the patient handover list during the board round and update any outstanding assessments, i.e. VTE and review EWS score. There are two Consultant-led ward rounds each week and two Registrar-led ward rounds. On Wednesday, there is a resident doctor-led ward round, followed by a senior review of all patients at a board round. Ward rounds are often a great learning opportunity, as juniors are expected to present patients and to know the recent test results as well as trends. Discussions around investigations and management plans and work-based assessments are encouraged. There is often a huge diversity of clinical presentations on the ward. Clinical presentations vary from acute kidney injury, acutely unwell transplant patient, dialysis patients admitted with medical or dialysis-related issues. There are regular elective admissions for procedures (renal biopsies, dialysis line insertions), vascular dialysis access surgery (arterio-venous fistula formation and peritoneal dialysis catheter insertions/exchanges/removals) and patients undergoing interventional radiology procedures (fistuloplasties, renal artery stenting). The ward also has a procedure room where procedures such as dialysis line insertions and removals, native and transplant kidney biopsies, pleural aspirations, ascitic drain insertions and lumbar punctures are performed. As a Foundation Doctor you will have the opportunity to place ultrasound-guided central lines (for temporary dialysis/plasma exchange) and to remove tunneled dialysis lines under supervision. There is a Daycase unit on the ward for renal patients requiring outpatient treatments, surgery or procedures, chemotherapy, and blood transfusions. This is a nurse-led facility but may call upon doctor support when required. There are opportunities to attend a variety of renal clinics ranging from general nephrology, transplant and living donation clinics, renal HOT clinics, hypertension, Young Persons' transition renal clinics, and genetics clinics, to name a few.</p>
Main duties and further information about the placement	<p>In addition to standard ward duties (organising the ward round, taking bloods, writing discharge summaries, etc). You will be expected to clerk in patients admitted to the ward via many routes of admission; direct admission from home/clinic bypassing emergency departments, direct admissions from dialysis units or transfers from another hospital. As this is a regional renal ward, there are many patients</p>

	transferred from external Trusts, and the receiving ward for any patients stepped down from Intensive Care Units with single-organ kidney failure. Therefore, there are many opportunities to practice clerking, initiating management, and learn from expert multidisciplinary teams (dialysis and transplant specialist nurses, and renal pharmacists).
Clinical Supervisor(s) <i>This may be subject to change</i>	Dr Richard Kingston, Dr Hannah Kilbride, Dr Ian John, Dr Michael Delaney, Dr Mike Bedford, Dr Matthew Carroll, Dr Ming Leung, Dr Bernhard Klebe, Dr Nilesh Shah, Professor Chris Farmer, Dr Nasir Abbas
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	<p>Mon: 8:30 am – 5:30 pm, ward round then ward work.</p> <p>Tues: 8:30 am – 5:30 pm, ward round then ward work.</p> <p>Wed: 8:30 am – 5:30 pm, ward round then ward work. 1:30 pm – 2:00 pm, Renal MDM, followed by weekly department teaching (2:00 pm – 3:00 pm). (You will be timetabled to perform one presentation during this rotation, as either a case presentation or journal club). Every two months, there is a renal clinical governance meeting where learning from incidents is shared, and improvement action plans formed and reviewed.</p> <p>Thurs: 8:30 am – 5:30 pm, ward round then ward work and protected F2 teaching (1:00 pm – 2:00 pm). 10:00 am – 12:00pm monthly renal histopathology meeting</p> <p>Fri: 8:30 am – 5:30 pm, ward round then ward work. Monthly site grand rounds (1:00 pm – 2:00 pm). Local weekly renal teaching for trainee doctors.</p> <p>No on call requirements as Renal F1.</p>
For further information, please contact the Local Education Provider (LEP) administrative contact	https://kss.hee.nhs.uk/kent-and-canterbury-prospectus/

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Respiratory Medicine
Grade	F1
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	William Harvey Hospital, Kennington Rd, Willesborough, Ashford, TN24 0LZ
Type of work to expect and learning opportunities	<p>Cambridge J2, the main respiratory ward consists of 19 patients. There are seven respiratory consultants looking after the patients at any time in weekly rotation. The team consists of a mixture of junior and senior doctors, including a Higher Specialist Foundation Doctor, and dedicated nurses who are responsible for all patients on CJ2. Respiratory patients on the ward are those requiring specialist respiratory care, or with other acute general medical disease. There is a daily morning board round, in which all respiratory patients are discussed, mainly to clarify ongoing care and to estimate their expected date of discharge from hospital. After the ward round, the juniors are assigned to each of 3 bays (with 6 patients) and a side room. Consultants are available on every week day for morning ward rounds, and to review all patients in the late afternoons. There are currently only Respiratory Consultants on the wards during 50% of weekends. In the other weekend days, the consultant on call for GIM will be responsible for care of patients, usually with potential for cross site cover for advice for respiratory care. Ward round tends to be complete between 12:00 and 13:00 with ample opportunity for breaks. Aside from usual FY teaching, there is usually Radiology teaching with one of the Respiratory Consultants on a Monday, where a light lunch is provided with support of the pharmaceutical industry. Where the ward rounds need to continue, they do so after lunch break. Jobs are fairly standard for any medical ward with some completed immediately as the ward round occurs, e.g. prescribing or crossing off drugs on electronic charts. Clinical activity continues after the ward round, such as procedures, completion of electronic discharge summaries (EDNs) with discharge medication, ordering investigations, writing referrals on Careflow (the IT system for referrals), liaising with other teams to make referrals or ask for advice, speaking with patients or relatives regarding their progress, or referring patients to the Med Reg at Canterbury hospital to be sent there (because they're medically fit but just in hospital for social/physio reasons). Practical procedures, range from taking blood tests or inserting cannulas that are difficult, adjusting non-invasive ventilation, or pleural drain insertion/care which are always supervised by at least a Registrar-grade doctor competent in ultrasound. The respiratory ward will have more critically ill patients than many other wards, so there is ample opportunity to develop medical skills in managing such patients and end of life</p>

	matters, always with appropriate support. There is a separate Respiratory Consultant taking respiratory referrals from around the hospital and identifying admissions for CJ2, and a pleural team which includes another Respiratory Consultant who can offer assistance for inpatients who have pleural disease.
Main duties and further information about the placement	Ward rounds and completion of clinical plans Completion of electronic discharge summaries Electronic / verbal referrals to other teams Requesting investigations Seeing patients/ addressing concerns e.g. raised by nurses Blood tests, cannulas, pleural procedures (if appropriate) During the acute block, seeing new medical patients in A+E, and formulating plans for them until post-taking them with the consultant.
Clinical Supervisor(s) <i>This may be subject to change</i>	Dr Sharma Dr Baghai-Ravary Mr Mirza Shirazi Dr S Hassan
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	See above.
For further information, please contact the Local Education Provider (LEP) administrative contact	https://kss.hee.nhs.uk/william-harvey-prospectus/

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Stroke Medicine
Grade	F1
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Kent and Canterbury Hospital, Ethelbert Road, Canterbury, CT1 3NG
Type of work to expect and learning opportunities	<ul style="list-style-type: none"> - Ward round: Consultant reviews new patients; Resident Doctors review the rest of the patients on the ward. - Hand over in the morning at 8 AM in Harbledown ward, afternoon catch-up board round on Harbledown and Kingston wards - Carry out jobs from ward round. - Referrals and EDNs. Learning opportunities including the weekly neuroradiology meeting where images are discussed. - Teaching on ward, interpreting CTs, MRIs, Dopplers, and the presentation of strokes. - Wednesday lunch time stroke teaching - Attend Stroke-radiology MDM at least once - Attend Stroke Mortality and Morbidity meeting at least once - Attend thrombolysis calls
Main duties and further information about the placement	<ul style="list-style-type: none"> - Reviewing patients. - Attending daily MDM to provide updates on patients' medical progress. - Daily VTE round with the nurses. - Updating patients and their families. - Writing EDNs and making referrals.
Clinical Supervisor(s) <i>This may be subject to change</i>	Dr. Baht Dr. Hargroves Dr. Balogun
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	8.00am start. Consultant review new patients. Multi disciplinary review (MDR). Carry out ward jobs. Will have posting in Harbledown ward and Kingston ward during the rotation
For further information, please contact the Local Education Provider (LEP) administrative contact	https://kss.hee.nhs.uk/kent-and-canterbury-prospectus/

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Urology
Grade	F1
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Kent and Canterbury Hospital, Ethelbert Road, Canterbury, CT1 3NG
Type of work to expect and learning opportunities	<p>A typical day starts at 07:45, ensuring the list is updated, and that patients for theatre that morning have had G&S, blood clotting tests and any urgent cannulas. At 08:00, there is a handover from the night teams for new admissions, which we then review. After that, the ward rounds commence, split into the cold (elective) ward round and hot (emergency) ward round with the registrar and/or on-call consultant. Often, during the ward round, other consultants will review their patients. After the ward round, jobs (including catheterisation, cannulation, discharges, managing urosepsis, urinary retention, referrals, arranging appropriate antibiotic treatment, addressing concerns of families, arranging imaging, etc.) are completed in order of priority whilst addressing any emergencies that may arise on the ward throughout the day.</p> <p>There will be exposure to urological emergencies and management of urological/surgical patients both pre and post operatively.</p> <p>Once every month there is a morbidity and mortality meeting where we discuss patients who had complications or passed away. A list of suitable patients must be kept up to date on Careflow. You will attend the M&M to understand the process and learning points from each case. There is an educational afternoon after M&M which you should attend if the ward allows it.</p>
Main duties and further information about the placement	EDNs, catheter insertion (male and female), cannulas, blood tests, referrals, arranging imaging, ensuring senior review, blood transfusions, assessing urosepsis and managing appropriately, urinary retention, renal colic and haematuria management and when to intervene, prescription charts, fluid management, palliative care management.
Clinical Supervisor(s) <i>This may be subject to change</i>	Ms Li Tay Mr Thomas Mr Crockett Ms Gordon Prof Kommu
Typical working pattern in the placement. e.g.	Mon: 8:00 am – 5:00 pm, Ward Round Tues: 8:00 am – 5:00 pm, Ward Round. Protected F1 teaching 1:00 pm – 2:00 pm

<p>ward rounds, clinics, theatre</p>	<p>Wed: 8:00 am – 5:00 pm, Ward Round Thurs: 8:00 am – 5:00 pm, Ward Round. Protected F1 teaching 1:00 pm – 2:00 pm Fri: Medical Directorate teaching 1:00 pm – 2:00 pm. 8:00 am – 5:00 pm, Ward Round Sat: 8:00 am – 8:00 pm (handover starts at 8:00 pm) Sun: 8:00 am – 8:00 pm (handover starts at 8:00 pm), one doctor covers all of surgery</p> <p>During your rotation, you will undertake the Urology and Vascular on-call.</p> <p>F1 Normal Day: 8:00 am – 5:00 pm F1 Long Day (On-call): 8:00 am – 8:30 pm F1 Half Day: 8:00 am – 12:30 pm</p> <p>If you are on call, it is your responsibility to arrange a swap with one of your colleagues. As long as the doctor you swap with is the same grade, you can swap with either Urology or Vascular.</p> <p>All F1s will have 4 days of self-development time during their 4-month rotation. We do not require you to be on site for these, but please ensure you make good use of them rather than treating them as extra off days. We will endeavour to allocate time for you to attend theatre and shadow our POPs Consultant. This will be included in the weekly rota that we will send out once you have started the rotation.</p>
<p>For further information, please contact the Local Education Provider (LEP) administrative contact</p>	<p>https://kss.hee.nhs.uk/kent-and-canterbury-prospectus/</p>

Specialty	Cardiology
Grade	F1
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Queen Elizabeth The Queen Mother Hospital, St Peters Road, Margate, Kent, CT9 4AN
Type of work to expect and learning opportunities	You will be managing patients on the Coronary Care ward in accordance to plans set by senior doctors. There will be opportunities to attend outpatient clinics, elective cardioversion, and cardiac catheterisation procedures.
Main duties and further information about the placement	As the sole F1 on a 12-bed ward, you will be responsible for ensuring the management plans set out by senior doctors for each patient are efficiently carried out. This may include ordering investigations, performing venepuncture and arterial blood gas sampling, referring patients to other specialities both locally and at tertiary centres, and requesting patient records from other hospitals. The workload is manageable, and nursing staff are experienced and supportive. You will also be part of the General Internal Medicine on-call rota.
Clinical Supervisor(s) <i>This may be subject to change</i>	Dr. Al Karoudi
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	<p>Working hours:</p> <ul style="list-style-type: none"> • 08:00 - 17:00, depending on workload and the availability of senior house officers to assist. • On-call hours: 08:00-20.30 <p>Opportunities: Observation of procedures such as coronary angiograms and pacemaker insertions.</p>
For further information, please contact the Local Education Provider (LEP) administrative contact	https://kss.hee.nhs.uk/queen-elizabeth-the-queen-mother-prospectus/

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Gastroenterology
Grade	F1
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Queen Elizabeth The Queen Mother Hospital, St Peters Road, Margate, Kent, CT9 4AN
Type of work to expect and learning opportunities	<p>Daily ward rounds with a different consultant each week. Expected to carry out jobs including organising and checking investigations, and acting on the results, and referrals to other specialties. Managing acutely unwell patients on the ward. The ward is made up of gastroenterology patients and acute patients.</p> <p>Exposure to endoscopy procedures (in-patient lists) and specialty clinics.</p> <p>Participating in MDMs where possible: Liver (weekly Fridays), Upper GI cancer MDM (weekly on Mondays), IBD MDM (twice per month Fridays).</p> <p>Possibility to attend liver clinics, IBD clinics, endoscopy lists to enhance experience on gastroenterology-specific pathologies and their holistic approach at least once during the rotation.</p> <p>Attendance at mandatory F1 teaching days. Departmental teaching as well as Medical Half Days and Grand Rounds.</p>
Main duties and further information about the placement	Management of patients on the Gastroenterology ward, including jobs, procedures needed, liaising with different specialties, acute management when patients are unwell, and discussions with patients and their family/next of kin.
Clinical Supervisor(s) <i>This may be subject to change</i>	Dr. Laura Crisan
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	Ward-based, 08:00-17:00 weekdays. There will be a combination of SHOs, registrars, and consultants. Resident Doctors tend to arrive first to prep notes and organise the handover ready for the day.
For further information, please contact the Local Education Provider (LEP) administrative contact	https://kss.hee.nhs.uk/queen-elizabeth-the-queen-mother-prospectus/

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	General Psychiatry
Grade	F1
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Host Organisation: Kent and Medway NHS and Social Care Partnership Trust. Base: Queen Elizabeth The Queen Mother Hospital, St Peters Road, Margate, Kent, CT9 4AN (This post is based at the Mental Health Unit which is on the Acute Site)

Main duties and further information about the placement	<ul style="list-style-type: none"> - Taking part in providing assessments, arranging further investigations and treatment (on the ward/in the community) with appropriate consultant support as part of the local team of doctors. - Liaising with other medical specialties and other professionals. - Taking part in multidisciplinary team reviews. - Engaging with the medical students on local placement. - Engagement with local governance and quality initiatives. - Take part in teaching programme.
Clinical Supervisor(s) <i>This may be subject to change</i>	Dr Thomas Wild
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	Day of work on one of the wards, being part of the team of local doctors (2 days per week). Day of work with the local community team, supported by the community consultants (2 days per week). 1 day per week either in mental health service or general hospital, e g Acute Medical Unit. Full shift, Daytime timetable to be provided by Consultant supervisor, No on call rota. Max working hours = 40

<p>For further information, please contact the Local Education Provider (LEP) administrative contact</p>	<p>https://kss.hee.nhs.uk/queen-elizabeth-the-queen-mother-prospectus/</p>
---	--

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	General Surgery
Grade	F1
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Queen Elizabeth The Queen Mother Hospital, St Peters Road, Margate, Kent, CT9 4AN
Type of work to expect and learning opportunities	This is a busy general surgery department providing acute care with both elective and emergency patients. Your main duty is ward based as well as helping with post-taking patients after an on-call. There are weekly F1 structured teaching sessions in the Education Centre. Other learning opportunities include daily morning handovers, ward rounds, MDT meetings, morbidity & mortality meetings, weekly surgical teaching sessions and surgical radiology meetings. You will have the opportunity to attend outpatient clinics and theatre lists, and complete work-based assessments.
Main duties and further information about the placement	The F1 doctor is responsible alongside other staff, for the care of the patients on the surgical wards. They are responsible for maintaining correct and updated patient records. This should be done in conjunction with other team members. There is a daily morning ward round which the F1 is expected to attend and scribe at. The F1 is expected to complete all the jobs generated from the ward round with senior support.
Clinical Supervisor(s) <i>This may be subject to change</i>	Each F1 will have an allocated clinical supervisor. Supervisors include: Mr Sebastian Miss Lynes Miss Evans Mr Akhtar Mr Khushal Mr Ahmed Mr Mangam Mr Khan
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	A typical day would start with a ward round lead by a senior doctor. You make a list of jobs and complete these during the day. This would usually include ordering investigations, discussing radiological requests with Consultant Radiologists, taking blood, acting on investigation results and seeing sick patients, escalating them to senior review if appropriate. When your jobs are complete you can help the other surgical teams, attend theatre or attend clinic. The F1 doctors participate in a 1:8 on-call rota covering long days and weekends but with no night on-calls. During on-call shifts, you are based on the wards reviewing sick patients and completing outstanding day jobs from other surgical teams.

<p>For further information, please contact the Local Education Provider (LEP) administrative contact</p>	<p>https://kss.hee.nhs.uk/queen-elizabeth-the-queen-mother-prospectus/</p>

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Geriatric Medicine
Grade	F1
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Queen Elizabeth The Queen Mother Hospital, St Peters Road, Margate, Kent, CT9 4AN
Type of work to expect and learning opportunities	<p>The post offers broad exposure to acute and general geriatric medicine. Core activities include daily ward rounds, completion of ward jobs, managing acutely unwell patients, and preparing discharge summaries. You will work closely with the multidisciplinary team, including physiotherapists, occupational therapists, and social services, gaining practical experience in comprehensive geriatric assessment, delirium and falls management, frailty assessment, and end-of-life care planning.</p> <p>On-call shifts involve clerking emergency admissions as part of a supported medical team and developing competency in assessing and managing a range of acute medical presentations. Regular multidisciplinary meetings provide further insight into coordinated care for complex elderly patients.</p> <p>Teaching activities include:</p> <ul style="list-style-type: none"> • Tuesday Geriatric and General Medicine Tutorial (with monthly M&M on the last Tuesday). • Thursday Grand Round (1300 to 1400) • Monthly Medical Half Day (last Wednesday, 14:00–15:00). • Informal workplace-based teaching. • Opportunities to teach medical students. <p>Quality Improvement and Audit Opportunities</p> <p>The placement provides multiple opportunities to participate in meaningful Quality Improvement Projects and clinical audits. FY1 doctors are encouraged to identify areas for service optimisation within frailty, dementia, falls, discharge planning, or medication safety. Support is available from supervising consultants and the clinical governance team to design, implement, and present QI initiatives at departmental governance meetings, the monthly M&M, or trust-wide quality forums. This experience enables development of skills in data collection, analysis, change management, and reflective practice.</p>

Main duties and further information about the placement	<p>Routine ward tasks include making referrals, requesting and interpreting investigations, reviewing blood results, and safe prescribing. You will liaise regularly with microbiology, radiology, and pathology, and communicate with next of kin and family members regarding patient progress and care plans.</p> <p>The rota includes participation in both Hot and Cold on-call teams, providing exposure to acute medical assessments and continuity of ward-based care.</p>
Clinical Supervisor(s) <i>This may be subject to change</i>	<p>Dr. Naveed Qureshi Dr. Ismot Kabir</p>
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	<p>A typical day is mainly made up of ward round, and completing the jobs arising from this. One F1 doing 08:00 to 17:00 is usually supported by at least one SHO and/or Registrar.</p>
For further information, please contact the Local Education Provider (LEP) administrative contact	<p>https://kss.hee.nhs.uk/queen-elizabeth-the-queen-mother-prospectus/</p>

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	GIM & Endocrinology and Diabetes Mellitus
Grade	F1
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Queen Elizabeth The Queen Mother Hospital, St Peters Road, Margate, Kent, CT9 4AN
Type of work to expect and learning opportunities	<p>Deal ward is an acute general medical ward with a special interest in Diabetes and Endocrinology.</p> <p>In addition to a broad mix of general medical cases we receive patients with new diagnoses of diabetes, diabetic ketoacidosis, hyperosmolar coma (HHS) as well as diabetic foot emergencies.</p> <p>It is a busy ward with a high turnover of patients.</p>
Main duties and further information about the placement	There are daily consultant-led board rounds and ward rounds. There is good middle-grade support with two SpRs and two speciality doctors.
Clinical Supervisor(s) <i>This may be subject to change</i>	Dr.Christopher McGettigan
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	<p>There are opportunities to attend a variety of clinics (general endocrine, diabetes, foot, adolescent, lipid, antenatal), see specialty ward referrals, and spend some time with IP DSNs to gain practical experience in diabetes. We have weekly multi-disciplinary team meetings, which you are welcome to attend.</p> <p>You will join a friendly team.</p>
For further information, please contact the Local Education Provider (LEP) administrative contact	https://kss.hee.nhs.uk/queen-elizabeth-the-queen-mother-prospectus/

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	GIM & Rheumatology
Grade	F1
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Queen Elizabeth The Queen Mother Hospital, St Peters Road, Margate, Kent, CT9 4AN
Type of work to expect and learning opportunities	This post provides a good general introduction to the management of general medical in-patient care, including venesection and cannulation as well as the more specialist management of ambulatory care, rheumatology patients attending for biologics infusions, iloprost & osteoporosis treatment. Opportunities exist to learn some specialist procedures including joint injections & aspirations, and an introduction to joint ultrasound. Both consultants are enthusiastic teachers with plenty of experience to be gained in out-patient rheumatology clinics & weekly education meetings.
Main duties and further information about the placement	Care of in-patients & day case patients. This post will cross cover (for leave) with the FY1 in Diabetes & Endocrinology for in-patients on Deal Ward.
Clinical Supervisor(s) <i>This may be subject to change</i>	Dr Khan Dr De Lord
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	In-patient care of general medical and acutely unwell rheumatology patients, attendance at ward rounds and clinics, participation in on call GIM rota.
For further information, please contact the Local Education Provider (LEP) administrative contact	https://kss.hee.nhs.uk/queen-elizabeth-the-queen-mother-prospectus/

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Gynaecology
Grade	F1
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Queen Elizabeth The Queen Mother Hospital, St Peters Road, Margate, Kent, CT9 4AN

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Intensive Care Medicine
Grade	F1
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Queen Elizabeth The Queen Mother Hospital, St Peters Road, Margate, Kent, CT9 4AN
Type of work to expect and learning opportunities	<p>The ITU in Margate is a busy unit, caring for a wide variety of acutely ill patients from across the Southeast. As an FY1 you are expected to work as part of the team, attending the ward rounds and documenting the clinical assessment of the patients and their management plan on a daily basis. Also, to ensure good communication between all specialties involved in the patient's care, ensure that all investigations and management plans are up to date and followed through.</p> <p>The unit is a great place to get hands-on experience in practical procedures such as ultrasound-guided peripheral cannulas, CVCs & Vascaths, and arterial lines. You can also observe and be involved in airway management, initiation and management of NIV and invasive ventilation etc.</p> <p>In addition, there are also opportunities to attend theatre to shadow the on-call anaesthetic team. As the ITU FY1, you will also accompany the ITU doctors and critical care outreach team when they attend cardiac arrests, and emergency calls.</p>
Main duties and further information about the placement	As above.
Clinical Supervisor(s) <i>This may be subject to change</i>	Dr. Moustafa Shebl Zahra
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	<p>There are two Consultants most of the days, one leads the ward round (responsible for ITU) and the 2nd covers outreach (looking after the sick patients in wards and A&E who need critical care support).</p> <p>Your main role is to attend the ward rounds every morning. You can also attend the outreach referrals and the medical emergency and cardiac arrest calls with the Consultant or Registrar and get involved in acute management of deteriorating patients.</p> <p>There is no allocated theatre or clinic times, but you can arrange to attend a theatre session with the anaesthetic team after discussion with your supervisor. During the</p>

	day, there are opportunities to review medical and surgical referrals, as well as cardiac arrest calls.
For further information, please contact the Local Education Provider (LEP) administrative contact	https://kss.hee.nhs.uk/queen-elizabeth-the-queen-mother-prospectus/

It is important to note that this description is a typical example of the placement and may be subject to change

Specialty	Liaison Psychiatry
Grade	F1
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Host Organisation: Kent and Medway NHS and Social Care Partnership Trust. Base: Thanet Liaison Psychiatry, Thanet Mental Health Unit Ramsgate Road, Margate. CT9 4BF (THIS POST IS BASED WITHIN THE HOSPITAL) (NPN - KSS/RVV09/052/F1/001)

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Respiratory Medicine
Grade	F1
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	William Harvey Hospital, Kennington Rd, Willesborough, Ashford, TN24 0LZ
Type of work to expect and learning opportunities	<p>Cambridge J2, the main respiratory ward consists of 19 patients. There are seven respiratory consultants looking after the patients at any time in weekly rotation. The team consists of a mixture of junior and senior doctors, including a Higher Specialist Trainee, and dedicated nurses who are responsible for all patients on CJ2. Respiratory patients on the ward are those requiring specialist respiratory care, or with other acute general medical disease. There is a daily morning board round, in which all respiratory patients are discussed, mainly to clarify ongoing care and to estimate their expected date of discharge from hospital. After the ward round, the juniors are assigned to each of 3 bays (with 6 patients) and a side room. Consultants are available on every week day for morning ward rounds, and to review all patients in the late afternoons. There are currently only Respiratory Consultants on the wards during 50% of weekends. In the other weekend days, the consultant on call for GIM will be responsible for care of patients, usually with potential for cross site cover for advice for respiratory care. Ward round tends to be completed between 12:00 and 13:00 with ample opportunity for breaks. Aside from the usual Foundation teaching, there is usually Radiology teaching with one of the Respiratory Consultants on a Monday, where a light lunch is provided with support of the pharmaceutical industry. Where the ward rounds need to continue, they do so after lunch break. Jobs are fairly standard for any medical ward with some completed immediately as the ward round occurs, e.g. prescribing or crossing off drugs on electronic charts. Clinical activity continues after the ward round, such as procedures, completion of electronic discharge summaries (EDNs) with discharge medication, ordering investigations, writing referrals on Careflow (the IT system for referrals), liaising with other teams to make referrals or ask for advice, speaking with patients or relatives regarding their progress, or referring patients to the Med Reg at Canterbury hospital to be sent there (because they're medically fit but just in hospital for social/physio reasons). Practical procedures, range from taking blood tests or inserting cannulas that are difficult, adjusting non-invasive ventilation, or pleural drain insertion/care which are always supervised by at least a Registrar-grade doctor competent in ultrasound. The respiratory ward will have more critically ill patients than many other wards, so there is ample</p>

	<p>opportunity to develop medical skills in managing such patients and end of life matters, always with appropriate support. There is a separate Respiratory Consultant taking respiratory referrals from around the hospital and identifying admissions for CJ2, and a pleural team which includes another Respiratory Consultant who can offer assistance for inpatients who have pleural disease.</p>
Main duties and further information about the placement	<ul style="list-style-type: none"> • Ward rounds and completion of clinical plans • Completion of electronic discharge summaries • Electronic / verbal referrals to other teams • Requesting investigations • Seeing patients/ addressing concerns e.g. raised by nurses • Blood tests, cannulas, pleural procedures (if appropriate) • During the acute block, seeing new medical patients in A+E, and formulating plans for them until post-taking them with the consultant
Clinical Supervisor(s) <i>This may be subject to change</i>	<p>Dr Sharma Dr Baghai-Ravary Mr Mirza Shirazi</p>
Typical working pattern in the placement. e.g ward rounds, clinics, theatre	<p>See above.</p>
For further information, please contact the Local Education Provider (LEP) administrative contact	<p>Link to specific trust information page on KSS website will be included here- https://kss.hee.nhs.uk/kss-foundation/trust-information-pages/</p>

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	General Practice
Grade	F2
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	This post is off-site and can be located within any of the East Kent GP practices, which span a large geographical area covering both rural communities and town centre practices. You may need to use public transport or your own vehicle to travel.
Type of work to expect and learning opportunities	A fantastic opportunity to understand the primary care structure in the NHS and gain insight into multi-professional working within a primary care network. This post offers the chance to treat the local patient community and increase understanding of the population's health needs, including the importance of opportunistic health promotion.
Main duties and further information about the placement	You will be involved in delivering primary care services to a wide range of service users at all stages of their life cycle (from cradle to grave) and arranging appropriate investigations, referrals, or follow-up care.
Clinical Supervisor(s) <i>This may be subject to change</i>	Each FY2 is allocated a clinical supervisor during their 4-month GP rotation.
Typical working pattern in the placement.	<p>Educational contract: 40-hour working week This can be done over 4 or 5 days, to be discussed with your clinical supervisor.</p> <p>GP clinics: start at 30-minute consultations to see your patients. This clinic is well supported by your GP team, who will have protected time for supervision during your clinics and to discuss all patients with you.</p> <p>Home visits: Must be supervised with your GP clinical supervisor and should not be attended alone.</p> <p>Educational sessions within your timetable include</p> <ol style="list-style-type: none"> 1. Tutorial with your clinical supervisor. 2. Thursday teaching. 3. Self-development time (<i>used for audit, taster days, or specialist interest days</i>). <p>This post offers the opportunity to learn about common primary care conditions across the curriculum, including the opportunity to understand multi-professional and holistic management of patients with chronic conditions. You will have the opportunity to attend multi-disciplinary meetings that contribute to the care of our patients in the community, namely practice, health and social care, and clinical meetings. You will gain some insight as to how</p>

	primary care integrates with secondary and community services as part of the patient care journey.

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Haematology
Grade	F2
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Kent and Canterbury Hospital, Ethelbert Road, Canterbury, CT1 3NG
Type of work to expect and learning opportunities	Mostly inpatient management of acute myeloid leukaemia, patients receiving intensive chemotherapy for lymphoma/myeloma, and complications of haemophilia. Learn the concepts of management of bone marrow failure, managing common side effects experienced by patients receiving chemotherapy, and febrile neutropenia.
Main duties and further information about the placement	Management of patients undergoing remission induction and consolidation therapy for acute myeloid leukaemia. Management of newly diagnosed myeloma and high-grade lymphoma. Management of inherited and acquired haemophilia.
Clinical Supervisor(s) <i>This may be subject to change</i>	Dr. Jayne Osborne
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	Cover acute haematology ward with daily ward rounds. Each day help with Cathedral Day Unit - Managing outpatient blood tests and assessing unwell patients in day unit.
For further information, please contact the Local Education Provider (LEP) administrative contact	https://kss.hee.nhs.uk/kent-and-canterbury-prospectus/

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Intensive Care Medicine / Anaesthetics
Grade	F2
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Kent and Canterbury Hospital, Ethelbert Road, Canterbury, CT1 3NG
Type of work to expect and learning opportunities	Management of critically ill patients, including gaining experience in central and arterial lines. Additionally, the Foundation doctors will have significant time allocated to learning and experiencing both anaesthetics and acute pain management. There is also the opportunity to attend chronic pain management sessions.
Main duties and further information about the placement	<p>This role is heavily supervised and involves supporting the ITU team by making referrals, ordering investigations and ensuring good documentation. There is no on-call or weekend work, and plenty of time is available for undertaking projects and procedures.</p> <p>In anaesthetics the Foundation doctors will always have an immediate supervisor.</p>
Clinical Supervisor(s) <i>This may be subject to change</i>	Dr. Martin Mayall
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	<p>The F2's predominant role is in intensive care. We aim to have a Foundation doctor covering the intensive care from 08:00 to 20:30, Monday to Thursday, using 8-hour shifts so that one of the doctors does not start until 12:30. On Friday, everyone finishes at 16:00 hours.</p> <p>All ITU Foundation doctors are expected to present at the Two -monthly morbidity and mortality meetings. Support professional activity (SPA) time is allocated for Thursdays and the Foundation doctors are freed up for foundation teaching when this is timetabled.</p>
For further information, please contact the Local Education Provider (LEP) administrative contact	https://kss.hee.nhs.uk/kent-and-canterbury-prospectus/

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Psychiatry – St Martins, Canterbury
Grade	F2
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Host Organisation: Kent and Medway NHS and Social Care. This post is off site at St Martins Hospital, Little Bourne Road, Canterbury, CT1 1TD

Tues: Team meeting and ward round Wed: Team meeting and ward round Thursday: Team meeting and ward round, protected F2 teaching 2.15pm-5pm Friday: Team meeting and ward round On calls: 2 sets of nights in 4 months 9am-9pm 2/3 weekend day shift in 4 months Weekday on-calls from 9am -9pm
For further information, please contact the Local Education Provider (LEP) administrative contact	https://kss.hee.nhs.uk/kent-and-canterbury-prospectus/

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Renal
Grade	F2
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Kent and Canterbury Hospital, Ethelbert Road, Canterbury, CT1 3NG
Type of work to expect and learning opportunities	<p>A typical working day starts with the MDT morning board round at 08:30 am, followed by the ward round at 09:00 am. The F2 doctor is expected to update the patient handover list during the board round and update any outstanding assessments, i.e. VTE and review EWS score. There are two Consultant-led ward rounds each week and two Registrar-led ward rounds. On Wednesday, there is a resident doctor-led ward round, followed by a senior review of all patients at a board round. Ward rounds are often a great learning opportunity, as juniors are expected to present patients and to know the recent test results as well as trends. Discussions around investigations and management plans and work-based assessments are encouraged. There is often a huge diversity of clinical presentations on the ward. Clinical presentations vary from acute kidney injury, acutely unwell transplant patient, dialysis patients admitted with medical or dialysis-related issues. There are regular elective admissions for procedures (renal biopsies, dialysis line insertions), vascular dialysis access surgery (arterio-venous fistula formation and peritoneal dialysis catheter insertions/exchanges/removals) and patients undergoing interventional radiology procedures (fistuloplasties, renal artery stenting).</p> <p>The ward also has a procedure room where procedures such as dialysis line insertions and removals, native and transplant kidney biopsies, pleural aspirations, ascitic drain insertions and lumbar punctures are performed.</p> <p>As a Foundation Doctor you will have the opportunity to place ultrasound-guided central lines (for temporary dialysis/plasma exchange) and to remove tunneled dialysis lines under supervision. There is a Daycase unit on the ward for renal patients requiring outpatient treatments, surgery or procedures, chemotherapy, and blood transfusions. This is a nurse-led facility but may call upon doctor support when required.</p> <p>There are opportunities to attend a variety of renal clinics ranging from general nephrology, transplant and living donation clinics, renal HOT clinics, hypertension, Young Persons' transition renal clinics, and genetics clinics, to name a few.</p>
Main duties and further information about the placement	In addition to standard ward duties (organising the ward round, taking bloods, writing discharge summaries, etc). You will be expected to clerk in patients admitted to the ward via many routes of admission; direct admission from

	home/clinic bypassing emergency departments, direct admissions from dialysis units or transfers from another hospital. As this is a regional renal ward, there are many patients transferred from external Trusts, and the receiving ward for any patients stepped down from Intensive Care Units with single-organ kidney failure. Therefore, there are many opportunities to practice clerking, initiating management, and learn from expert multidisciplinary teams (dialysis and transplant specialist nurses, and renal pharmacists).
Clinical Supervisor(s) <i>This may be subject to change</i>	Dr Richard Kingston, Dr Hannah Kilbride, Dr Ian John, Dr Michael Delaney, Dr Mike Bedford, Dr Matthew Carroll, Dr Ming Leung, Dr Bernhard Klebe, Dr Nilesh Shah, Professor Chris Farmer, Dr Nasir Abbas
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	Mon: 8:30 am – 5:30 pm, ward round then ward work. Tues: 8:30 am – 5:30 pm, ward round then ward work. Wed: 8:30 am – 5:30 pm, ward round then ward work. 1:30 pm - 2:00 pm, Renal MDM, followed by weekly department teaching (2:00 pm - 3:00 pm). (You will be timetabled to perform one presentation during this rotation, as either a case presentation or journal club). Every two months, there is a renal clinical governance meeting where learning from incidents is shared, and improvement action plans formed and reviewed. Thurs: 8:30 am – 5:30 pm, ward round then ward work and protected F2 teaching (1:00 pm – 2:00 pm). 10:00 am – 12:00pm monthly renal histopathology meeting Fri: 8:30 am – 5:30 pm, ward round then ward work. Monthly site grand rounds (1:00 pm – 2:00 pm). Local weekly renal teaching for trainee doctors. On-call requirements: 1:10 - weekends and 1:10 weekdays, covering Neurology, Renal, and Haematology between 17:00-21:30 (09:00-21:30 on weekends).
For further information, please contact the Local Education Provider (LEP) administrative contact	https://kss.hee.nhs.uk/kent-and-canterbury-prospectus/

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Urology
Grade	F2
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Kent and Canterbury Hospital, Ethelbert Road, Canterbury, CT1 3NG
Type of work to expect and learning opportunities	Ward rounds daily with SpR EDNs, blood tests, cannulas, catheters and referrals.
Main duties and further information about the placement	Ward rounds daily with SpR or consultant. EDNs, blood tests, cannula, catheters and referrals. Residents are expected to use their time flexibly to attend theatres, outpatient clinics and perform audits.
Clinical Supervisor(s) <i>This may be subject to change</i>	Dr Hale
Typical working pattern in the placement. e.g. ward rounds, clinics, theater	<p>Mon: 8:00 am – 5:00 pm, ward round/ward jobs Tues: 8:00 am – 5:00 pm, ward round/ward jobs Wed: 8:00 am – 5:00 pm, ward round/ward jobs Thurs: 8:00 am – 1:00 pm, ward round. Protected F2 teaching 2:15 pm – 5:00 pm Fri: 8:00 am – 5:00 pm, ward round/ward jobs. Off days are given for on-calls. On-call requirements: 1 in 8 days on-call</p> <p>During your rotation, you will be working on the Vascular and Urology on-call rota, via ECC with day and night shift weekdays and weekends. You will be supported by the Urology and Vascular registrar on-call.</p> <p>F2 Normal Day: 8:00 am – 5:00 pm F2 Long Day (On-call): 8:00 am – 8:30 pm F2 Night (On-call): 8:00 pm – 8:30 am</p> <p>Only the on-call doctors are required to work on Bank Holidays. If you are scheduled to work on a Bank Holiday, you will be entitled to a lieu day.</p> <p>All F2s will have 6 days of self-development time during their 4-month rotation. We do not require you to be on-site for these, but please ensure you make good use of them rather than treating them as extra off days. We will endeavour to allocate time for you to attend theatre and shadow our POPs Consultant. This will be on the weekly rota that we will send out once you have started the rotation.</p>

<p>For further information, please contact the Local Education Provider (LEP) administrative contact</p>	<p>https://kss.hee.nhs.uk/kent-and-canterbury-prospectus/</p>

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	General Practice
Grade	F2
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	This post is off-site and can be located within any of the East Kent GP practices, which span a large geographical area covering both rural communities and town centre practices. You may need to use public transport or your own vehicle to travel.
Type of work to expect and learning opportunities	A fantastic opportunity to understand the primary care structure in the NHS and gain insight into multi-professional working within a primary care network. This post offers the chance to treat the local patient community and increase understanding of the population's health needs, including the importance of opportunistic health promotion.
Main duties and further information about the placement	You will be involved in delivering primary care services to a wide range of service users at all stages of their life cycle (from cradle to grave) and arranging appropriate investigations, referrals, or follow-up care.
Clinical Supervisor(s) <i>This may be subject to change</i>	Each FY2 is allocated a clinical supervisor during their 4-month GP rotation.
Typical working pattern in the placement.	<p>Educational contract: 40-hour working week This can be done over 4 or 5 days, to be discussed with your clinical supervisor.</p> <p>GP clinics: start at 30-minute consultations to see your patients. This clinic is well supported by your GP team, who will have protected time for supervision during your clinics and to discuss all patients with you.</p> <p>Home visits: Must be supervised with your GP clinical supervisor and should not be attended alone.</p> <p>Educational sessions within your timetable include</p> <ol style="list-style-type: none"> 1. Tutorial with your clinical supervisor. 2. Thursday teaching. 3. Self-development time (<i>used for audit, taster days, or specialist interest days</i>). <p>This post offers the opportunity to learn about common primary care conditions across the curriculum, including the opportunity to understand multi-professional and holistic management of patients with chronic conditions. You will have the opportunity to attend multi-disciplinary meetings that contribute to the care of our patients in the community, namely practice, health and social care, and clinical meetings. You will gain some insight as to how primary care integrates with secondary and community services as part of the patient care journey.</p>

<p>For further information, please contact the Local Education Provider (LEP) administrative contact</p>	<p>https://kss.hee.nhs.uk/queen-elizabeth-the-queen-mother-prospectus/</p>

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	General Surgery
Grade	F2
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Queen Elizabeth The Queen Mother Hospital, St Peters Road, Margate, Kent, CT9 4AN
Type of work to expect and learning opportunities	This is a busy general surgery department providing acute care with both elective and emergency patients. Foundation Trainees are allocated to surgical consultants. The F2 doctors have regular scheduled theatre lists and outpatient clinics, with good supervision and the opportunity to complete work-based assessments. There are weekly F2 structured teaching sessions in the Education Centre. Other learning opportunities include daily morning handovers, ward rounds, MDT meetings, morbidity and mortality meetings, weekly surgical teaching sessions and surgical radiology meetings.
Main duties and further information about the placement	The F2 doctor is responsible, alongside other staff, for the care of the patients on the surgical wards. Their responsibilities will include participating in handover, working with their team to carry out ward work, and working closely with the F1 doctors. A typical day would start with a ward round led by a Consultant or Registrar followed by scheduled morning and afternoon sessions such as elective or emergency theatre lists, out-patient clinics, or on-call duties.
Clinical Supervisor(s) <i>This may be subject to change</i>	Each F2 will have an allocated clinical supervisor. Supervisors include Mr Khushal and Mr Harilingam.
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	There is a weekly timetable allocating Foundation Doctors to on-call, theatre, out-patient clinics or the emergency (CEPOD) operating list. The F2 doctors participate in a 1:12 on-call rota with core trainees and trust doctors. On-calls include covering long days, weekends and night shifts. F2 doctors would typically have 14 nights spaced out during the 4-month placement.
For further information, please contact the Local Education Provider (LEP) administrative contact	https://kss.hee.nhs.uk/queen-elizabeth-the-queen-mother-prospectus/

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Geriatric Medicine
Grade	F2
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Queen Elizabeth The Queen Mother Hospital, St Peters Road, Margate, Kent, CT9 4AN

****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	Academic placement
Grade	F2
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	<p>Any of the sites: Queen Elizabeth the Queen Mother Hospital (Margate), the Kent and Canterbury Hospital (Canterbury) or the William Harvey Hospital (Ashford).</p> <p>The academic rotation itself will be based in one of the education centres in either Margate, Ashford or Canterbury but will involve working Trustwide</p>
Type of work to expect and learning opportunities	<p>The aim is to introduce Foundation doctors to academic medicine, in order to encourage individuals to undertake research training and consider a clinical academic career.</p> <p>Brief outline of department: Our Medical Education Department is responsible for the education and training of over 700 doctors-in-training and over 500 medical students per year. We also support the provision of continuing professional development for all our locally employed doctors and Associate Specialist and Specialist Doctors. We are one of the largest, acute trusts in the country with a wide and diverse population across clinical settings.</p> <p>Our Specialised Foundation Programmes (SFPs) will support some Foundation Doctors to develop academic skills in addition to the clinical skills that are gained during the foundation years. The SFP in East Kent Hospitals University NHS Foundation Trust will provide excellent opportunities to develop Research, Education and Teaching and Leadership and Management skills in addition to the standard competencies outlined in the curriculum.</p> <p>We very much hope the programme will inspire and encourage successful individuals to pursue a career in Academic Medicine or Medical Education in the future. As with all Foundation Programmes, the primary aim of the SFP is to enable doctors to acquire and demonstrate the competencies described in the Foundation Programme Curriculum. Doctors on the SFP are required to maintain the same clinical skill level as those on a purely clinical programme, which means that SFP doctors must perform their academic work in addition to their foundation training.</p> <p>Each programme starts with a generic clinical F1 year which allows for newly qualified doctors to gain experience in a range of clinical posts, with the F2 year having one 4 month rotation focusing upon academic elements alongside additional clinical experience in the other 2 rotations.</p>

	<p>F1 doctors will meet with their academic supervisor(s) during their first year in order to discuss and plan for the following year and to prepare any necessary ethics applications. They will be encouraged to network with our Medical Education Clinical Fellows during their first year in preparation for collaboration with them in their F2 year.</p> <p>The 4- month dedicated medical education placement will involve work, outcomes and competencies as indicated below</p>
Main duties and further information about the placement	<p>Structure of project/what is expected</p> <p>We will discuss with successful applicants the specific nature of work and projects that will develop the academic competencies that the year should help develop.</p> <p>Indicative outcomes and the competencies able to be developed:</p> <p>1) Outcomes: Adapts teaching style to different learner needs and to different learning environments.</p> <p>a. Competencies:</p> <ul style="list-style-type: none"> • Describes and critically appraises the major pedagogic theories. • Adapts teaching style, as appropriate, during learning events. • Applies these theories to different professional groups, at different career stages (e.g. medical students, doctors, nurses) in different settings e.g. small groups (e.g. seminars, bed side teaching) and large groups (e.g. lecture theatres). • Examples of relevant supporting evidence • Lesson plans. • Feedback from participants. • Reflective logs on teaching sessions. <p>Content suggestions for programme designers</p> <ul style="list-style-type: none"> • Provide educational sessions and electronic resources that cover pedagogic theories. • Provide opportunities for foundation doctors to teach different professional groups in different settings. <p>2) Outcome: Develops and/or completes a piece of medical education research.</p> <p>a. Competencies</p> <ul style="list-style-type: none"> • Performs a systematic review of the literature. • Formulates a credible/realistic research question. • Describes different research methods available. • Examples of relevant supporting evidence • A completed manuscript. • An accepted abstract at a local/national/international meeting.

	<p>Content suggestions for programme designers</p> <ul style="list-style-type: none"> • Educational session that explores the techniques for completing funding applications and the principles of full economic costing. • Guidance and resources to identify suggested funding sources . <p>3) Outcome(s): Presents a project proposal to senior colleagues</p> <p>a. Competencies</p> <ul style="list-style-type: none"> • Produces a high impact written document. • Delivers an effective, high impact power point presentation. • Adapts presentation style to the specific audience. • Responds positively to feedback. <p>Examples of relevant supporting evidence</p> <ul style="list-style-type: none"> • Reflection on experience of presenting to senior colleagues. • Written document/PowerPoint presentation. <p>Content suggestions for programme designers</p> <ul style="list-style-type: none"> • Direct doctors to sample business cases/project proposals. • A session covering the art of good power point presentations. <p>4) Outcome(s) : Measures the effectiveness of a project and develops recommendations for the future.</p> <p>a. ****It is important to note that this description is a typical example of the placement and may be subject to change****

Specialty	General Practice
Grade	F2
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	This post is off-site and can be located within any of the East Kent GP practices, which span a large geographical area covering both rural communities and town centre practices. You may need to use public transport or your own vehicle to travel.
Type of work to expect and learning opportunities	A fantastic opportunity to understand the primary care structure in the NHS and gain insight into multi-professional working within a primary care network. This post offers the chance to treat the local patient community and increase understanding of the population's health needs, including the importance of opportunistic health promotion.
Main duties and further information about the placement	You will be involved in delivering primary care services to a wide range of service users at all stages of their life cycle (from cradle to grave) and arranging appropriate investigations, referrals, or follow-up care.
Clinical Supervisor(s) <i>This may be subject to change</i>	Each FY2 is allocated a clinical supervisor during their 4-month GP rotation.
Typical working pattern in the placement.	<p>Educational contract: 40-hour working week This can be done over 4 or 5 days, to be discussed with your clinical supervisor.</p> <p>GP clinics: start at 30-minute consultations to see your patients. This clinic is well supported by your GP team, who will have protected time for supervision during your clinics and to discuss all patients with you.</p> <p>Home visits: Must be supervised with your GP clinical supervisor and should not be attended alone.</p> <p>Educational sessions within your timetable include</p> <ol style="list-style-type: none"> 1. Tutorial with your clinical supervisor. 2. Thursday teaching. 3. Self-development time (<i>used for audit, taster days, or specialist interest days</i>). <p>This post offers the opportunity to learn about common primary care conditions across the curriculum, including the opportunity to understand multi-professional and holistic management of patients with chronic conditions. You will have the opportunity to attend multi-disciplinary meetings that contribute to the care of our patients in the community, namely practice, health and social care, and clinical meetings. You will gain some insight as to how primary care integrates with secondary and community services as part of the patient care journey.</p>

<p>For further information, please contact the Local Education Provider (LEP) administrative contact</p>	<p>https://kss.hee.nhs.uk/william-harvey-prospectus/</p>

Specialty	Public Health
Grade	F2
Trust	East Kent Hospitals University NHS Foundation Trust
Site name and address (include trust name if different to employing trust)	Host - Kent County Council, Sessions House, Maidstone, ME14 1XQ
Type of work to expect and learning opportunities	<p>There are three domains of Public Health practice:</p> <ul style="list-style-type: none"> - Health protection: Working as part of a multidisciplinary team for outbreak control and disease surveillance, vaccination and screening assurance. - Health improvement: Planning and undertaking interventions for healthy lifestyle and behaviour change, coordinating campaigns, contributing to commissioning services, and developing prevention strategies, including those aimed as tackling health inequalities. - Healthcare: Public health professionals work in partnership to plan and improve health care services using best evidence and health intelligence, such as Population Health Management. <p>The KCC Public Health team, led by Director of Public Health, is primarily a commissioning team supported by a team of consultants and specialists. The team works in partnership with the NHS, district councils, voluntary organisations and local NHS Trusts (KCHFT), who act as providers for health improvement services and universities for research work.</p>
Main duties and further information about the placement	<p>Trainees will be consultant-supervised and engage in various activities such as strategy/report writing, data analysis and intelligence gathering, evidence reviews, clinical pathway development, and health improvement service delivery.</p> <p>Key examples:</p> <ul style="list-style-type: none"> • Population Health Management: Close partnership working at strategic (ICB) and operational levels (PCNs) on data-driven PHM activities, such as patient risk stratification, population segmentation, service evaluation, and health inequalities reduction (based on the national Core 20 + 5 strategy). • Whole Systems Obesity Programme: A system mapping exercise led by the Public Health team, working with stakeholders from the NHS, local government, and voluntary organizations to understand their roles in tackling obesity. The program includes workshops to explore socio-economic factors affecting obesity.

	<p>Trainees can participate in network facilitation, stakeholder engagement, and evaluation work.</p> <ul style="list-style-type: none"> • Mental Health / Substance Misuse: Trainees will be placed in voluntary organizations responsible for treatment services (e.g., CGL in West Kent, Forward Trust in East Kent, and inpatient detox at KMPT Maidstone). Trainees will work alongside senior clinical consultants in assessments for complex cases, attend case review meetings, and gain understanding in medicines management for substance misuse. <p>Other Activities:</p> <ul style="list-style-type: none"> • Shadowing opportunities at key meetings (e.g., stakeholder groups, partnership boards, cabinet committees, ICS, PHM, COVID Health Protection Board, Kent Resilience Forum). • Literature and evidence reviews, panel participation (e.g., IFR and PRGC). • Contributing to Health Needs Assessments, Health Equity Audits, and other reports. • Research collaboration with local universities.
Clinical Supervisor(s) <i>This may be subject to change</i>	Dr. Ellen Schwartz
Typical working pattern in the placement. e.g. ward rounds, clinics, theatre	Working Arrangements: <ul style="list-style-type: none"> • Trainees will mostly work from home, remotely accessing KCC email and shared folders through their personal laptops. • Occasionally, trainees may be asked to attend meetings in person at the base or other locations across Kent. • Working hours are between 09:00 and 17:00. • Trainees must inform their clinical and project supervisor in advance if they are taking leave and update their KCC diary/calendar accordingly.
